Modular Connection System (MCS)

The Right Connection®

Applications
- Agricultural, automotive, demolition, die casting, mobile construction equipment, oil & gas, railroad, snow & ice removal, steel, forestry, and mining

Sizes
- 3/8”, 1/2”, 3/4”, and 1”

Features
- A single system that holds multiple hydraulic quick couplings
- Modularity: Blocks can be configured to meet customer needs (patent pending)
- Innovative coupling retention system for easy field repair (patent pending)
- Versatile: Up to 10 couplings can be used at once depending on size
- 450+ configurations possible
- 17-4 stainless steel alignment pins maximize corrosion resistance
- Cam-style latching mechanism helps provide a smooth connection
- HTE (male) and HTZ (female) coupling technology enables connections under residual pressure

Approvals
- All working configurations approved **3000 PSI** working pressure
