Climb Nets

Our climb nets are made of steel-loaded polyamide cables with UV guard. Using a steel wire core in edge ropes we ensure a long life for each net. The nets help children learn and develop their sense of balance while providing a fun and exciting unit within the playground for physical development.

Net Jumpers

The Jumping Spider is a speciality climbing structure featuring a flexible centre area surrounded by netting. It is made of steel-loaded polyamide cables with UV guard and the landing surface is a textile-reinforced flexible rubber material. Made from the highest steel content in the industry, including a steel-wire core in our edge ropes, to ensure long life of the games and maximum safety for the children. These games help bring movement, balance, exercise and fun back into the playground.
