

Multi Use Games Areas are manufactured from heavy duty galvanised and powder coated steel. Available in many different sizes, they can be designed to fit into most locations, all complying to the British Standard Product Assessment PAS 30 1998.

The sides are available in heights of 1m,2m,3m or 4m.

Perimeter walls are constructed from heavy steel mesh panels, these aid ball rebound whilst eliminating excessive noise. Each court has at least two hydraulic self closing gates as standard.

4m high wall with two self closing pedestrian gates.

Polyethylene backboard and stainless steel hoop.

Blue twin court with orange goals.

22m x 12m x 4m court with basketball and 5 a-side thermoplastic line markings.
