

# MOPPING & CLEANING SYSTEMS

The principle of cleaning a cleanroom or controlled area is quite straightforward however the criteria and methods applied can vary considerably from one application to another.

Our range of mops and accessories will help maintain a stringent level of cleanliness and the numerous mop designs and materials available will meet the demands of any industry or environment concerned with controlling contamination.

The unique designs and vast number of available options ensures there is a product or system for cleaning any area or the equipment within it. In general, mops are compiled of three parts, the mop handle, the adapter and the mop head.

Due to the extremely wide range available in this section we are only providing a summary of the systems from our key suppliers. We can provide further details on specific products or we can normally visit your facility to give information or advice.

**MICRONOVA:** The widest range of mops and tools for cleaning all environments and equipment.

**CONTEC:** A choice of mops for floor and wall cleaning plus isolator cleaning tools.

**BERKSHIRE:** Economical mop range for cleaning of floors and walls plus isolator cleaning products.

**VILEDA:** The popular "Roll-O-Matic" self wringing mopping systems plus the full Vileda range of mops.
