HENKEL
PREMIUM
PARTNER 

Direct Adhesives operate from two 25,000 ft² sites located in Leighton Buzzard and Coventry.

From our base in Leighton Buzzard, we distribute products from Henkel and Power Adhesives and have facilities for technical support for our customers. Most importantly, we are always on the end of a phone (or email) to deal swiftly and efficiently with our customers needs.

At Coventry, we manufacture a wide range of water based adhesive products, supplied in a variety of pack sizes. Recent investment in bulk mixing equipment for D3 water resistant PVAc wood adhesives shows our commitment to supplying high quality adhesives, engineered for the UK market.

As Premium partners of **Henkel**, we can bring you the best. Henkel has an enormous commitment to R&D and its latest generation of **Technomelt Supra Hot Melts** offer customers new levels of performance and economy.

How safe is your adhesive?

Henkel is totally committed to safety. From innovations in Cool technology to reduce the burn risk from hot melt adhesives right the way up to dedicated research to ensure that our adhesives are safe for food packaging, no other manufacturer does more.

COOL stands for safety

With application temperatures significantly lower, the risk of serious burns to operators is limited.

Moreover, health concerns due to exposure to fumes and volatile substances are reduced.

Not sure? We are happy to help, with advice and solutions

There is far more to hot melt glue sticks and guns than you may think. Adhesives in this form can be sprayed, used for peelable applications, there are even very cost effective products for application of pressure sensitive adhesives and PUR products too.

tec glue guns tec 4008B tec 4500S

Versatile
tec 4008B is a highly versatile hot melt glue applicator in a range of spray applications. Lightweight, it is ideal for use in confined spaces and for spraying adhesives.

For bulk & shaped glue
Features a custom hot chamber and trigger mechanism for glue. tec 4500S is ideal for application of pressure sensitive adhesive (PSA) in a range of applications or for spraying.

Decreased operator fatigue
Optimal reliability and ease-of-control. tec 4500 features a redesigned trigger and trigger mechanism. Ergonomically designed for 1-handed use, the gun quickly and easily switches from spray to bulk or application to bond out, or spray, time.

Intelligent design
The innovative hot chamber allows the tec 4500 to use bulk glue or shaped adhesives. It also features a redesigned hot chamber for quick & easy refilling of the glue gun. The redesigned mechanism means less heat energy consumption, resulting in a longer usable run time.

Additional features
The tec 4500 also boasts a built-in hot surface indicator, non-slip grip and a built-in safety lock. It is also designed for easy and safe operation, and comes with a protective shield to prevent damage to the operator's face.

tec 4500B & tec 4500S
tec 4500B is a hot melt glue gun with a built-in hot chamber for the application of PSA or bulk glue. It is ideal for use in a range of applications, including PSA, bulk glue, and spray. It is also designed for easy and safe operation, and comes with a protective shield to prevent damage to the operator's face.

Max rate	Greater than 200g / 30g / 200ml/hr
Capacity	More than 100g / 100ml / 100g
Weight	1.2kg / 1.2kg / 1.2kg
Max temp	210°C
Heat	Control
Temp control	Pressure sensitive
Material used	PSA, bulk glue, spray
Dimensions (mm)	100 x 100 x 100
Accessories	See tec 4500B & tec 4500S

NEW-NEW-NEW

tecbond adhesives Pcelite 210

net 12mm (1/2") peelable glue
This adhesive is a highly versatile, pressure sensitive, hot melt glue that is ideal for use in a range of applications. It is also designed for easy and safe operation, and comes with a protective shield to prevent damage to the operator's face.

10 specialist tools required
tec 210 can be used with conventional "open" hot melt glue guns, rather than specialist tools. This means you can save cost even more a change of gun (from 1 to 2) gun gun.

low-destructive
pressure sensitive glue. Pcelite 210 can be removed easily using dry without any residual glue or other. Other special devices to work damage other parts, making it ideal for temporary repairs. You can use on many different materials, including plastic and a range of paper types, even board with some special finishes and laminates. The real benefit is demonstrated using the glue on a hot melt glue. There's no information in our video, which you can find on the application of the adhesive on a hot melt glue.

easy to use & cost effective
Conventional hot melt glue guns can only be used through the hot melt glue gun. tec 210 can be used in a tec 200-C glue gun. This means it is a more cost-effective solution. And it is also designed for easy and safe operation, and comes with a protective shield to prevent damage to the operator's face.

ideal for... creating temporary bonds that can easily be peeled apart

- 1** **Temporary bonds**
Ideal for fixing cables or other cables to letters which can then be easily removed without damaging either surface.
- 2** **Quick-release**
Pcelite 210 is perfect for attaching objects to products to measure or evaluate for compliance.
- 3** **Quick-release**
Pcelite 210 can also be used to create temporary bonds with a 12mm glue gun without the need for a specialist application.
