Players Tunnels

Stuart Canvas has been producing retractable tunnels for both sport and industry for over 20 years. We design and manufacture to suit the client's exact needs, from the first site survey to the final installation.

We offer a design, supply and installation service for retractable players tunnels and also have a dedicated R&D team that can solve any unusual covering issues or requirements you may have. Our tunnels can be produced free standing or can include floor mounted and sunken tracking to aid smooth movement.

We have produced players tunnels for clubs across the UK, including; Manchester City, Manchester United, Everton FC, Wrexham A.F.C, Ipswich Town FC, Leeds United, Dragons Rugby & Plymouth Argyle FC.
