PRESTFELDE PREPARATORY SCHOOL — SY2 6NZ

**SOVEREIGN**  
Bringing Imagination into Play

The client had a large existing space in their already barked play area that needed some attention and left a void between the existing play equipment. Sovereign came up with a number of options to fill these areas that used a series of play units that adequately performed for all the children at the school.

The beauty of these areas were that they allowed the children of all the ages at this particular school to have hands-on experiences tailored to their developmental stages, offering challenges that grow progressively with their age range. The staff are delighted with the results and the children even more so.

» "The delivery was a good service arriving on time and the driver was very helpful, then soon after the installation team arrived. The team were very helpful and didn't bother us at all whilst we were working, they left the site tidy and safe.

The installation was completed to a great quality, and once they left they everything and had explained all the relative information, a good result overall!"
