

CASE STUDY

LARKHILL PRIMARY SCHOOL – SK3 9PH

SOVEREIGN
Bringing Imagination into Play

Our recent work with Larkhill Primary School included creating a new outdoor play space and shelter for the children, as well as making needed repairs to their outdoor steps to improve safe access. After having worked with Sovereign on previous play equipment projects, Larkhill reached out to us again, knowing they could rely on our quality and service.

The design and installation went smoothly, with everything delivered as promised and with minimal disruption. Now, the children can enjoy their outdoor space in all weather, and the repaired steps have opened a fresh area for the youngest children in reception, giving them a safe place to explore, play, and learn.

» FEEDBACK

What were the reasons for starting your project?

"Our outdoor steps were unsafe and required repair."

How did you discover Sovereign and why did you choose us?

"We've worked with Sovereign before (most recently for the installation of our pergola and basket seat log swing) and were happy with the previous work."

What was your experience of our design and installation process?

"The design and installation process were efficient, everything was done as quoted for."

How has our equipment impacted or benefitted your school/organisation?

"The safe steps have opened a new area for reception children to access for play and learning."

How has our equipment impacted or benefitted your school/organisation?

"Excellent."

» "We've worked with Sovereign before - the design and installation process were efficient and overall, our experience was excellent."
