

Beeches Recovery

PDC consultancy was contracted by Beeches Recovery to create a secure location where recovered vehicles could be stored.

The mezzanine floor will hold two large family cars with a floor loading of 9.6Kn/m². The is room under the mezzanine floor wfor two further cars. All four pods are secured with lockable shutter doors.

Works under taken in this project:

- Mezzanine floor
- Access staircases
- Steel partitioning
- Roller shutter doors
- Lighting and sockets
