

# Dishwasher Logger

**Ensure that your dishwashers are running at the correct temperature to achieve thermal disinfection.**

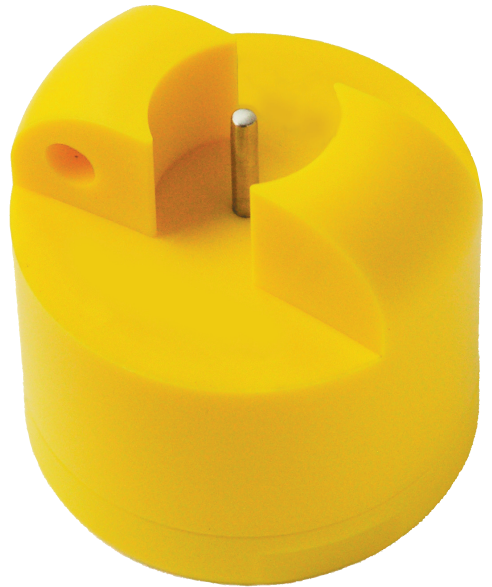

Loggers specifically designed for immersion measurements such as washer disinfectors and dishwashers. Waterproof, with a temperature rating of 102°C, this unit is suitable for use in a number of washing applications such as industrial dishwashers.

The unit has a high visibility yellow case and an external probe which gives it a fast response time. The unit can be returned for battery replacement, calibration and repair.

Data is downloaded to the computer via a USB or serial download pad. This 'wireless connection' eliminates the need for sockets with waterproof caps which can easily be lost or forgotten.

## FEATURES

- Submersible temperature recorder
- Waterproof to 15m
- 32,000 reading capacity
- User-programmable logging interval
- 2 user-programmable alarms
- Delayed and trigger-start options
- 3 stop options
- Low battery warning

**98-0200-01**

Waterproof, fast response & high temperature loggers

**SPECIAL OFFER!**

List price  
Logger & software **£230.00**  
Now only **£185.00**

Additional Loggers  
only **£115.00**

# KS01-S Dual Purpose Temperature Probe

Another 'Industry-first' from TME, this excellent probe has a broad temperature sensor which is partially encapsulated in a silicon compound which renders it completely waterproof. This means that you can use this probe for both water immersion and pipe surface temperature testing without having to change probes. This is both convenient & time saving. It has become the 'probe of choice' for numerous Legionella Specialists and Engineers since its launch in Summer 2010.

**£65.00**

## FMK2 Facilities Management Kit

Our latest temperature measuring kit for Facilities Managers includes our excellent MM2000 waterproof thermometer with the KS01-S Dual-Purpose Probe and a handy holster. Optional extras available for this kit include a belt clip or shoulder strap at £5.00 each. This leaves both hands free when carrying out your tests making it ideal for Legionella risk management. This kit is also available with our MM2020 dual-input waterproof thermometer preferred by many HVAC and refrigeration engineers.

Single input **£160.00**

Dual input **£185.00**

Photograph includes belt clip (optional extra) for demonstration purposes
