

## Rigid PVC film and PET foil for Packaging Applications

- ROLLS & SHEETS
- MONO SHRINKABLE FILM for Wine Caps and Sleeve
- FILM for BOX – FILM for BLISTER/THERMOFORMING
- Wide Range of COLOURS
- PVC ~ A-PET ~ PET-G ~ BIO-PET ~ R-PET

## TECHNICAL DATA:

### R-PET

Thickness from 150 to 800 $\mu$ , width up to 1.700 mm

### A-PET

Thickness from 50 to 800 $\mu$ , width up to 1.700 mm

### PET-G et BIOPET

Thickness from 40 to 800 $\mu$ , width up to 1.700 mm

### RIGID PVC

Thickness from 30 to 750 $\mu$ , width up to 1.650 mm

All our standard products are Light Blue Transparent, but we can also produce coloured film.

The minimum quantity is : 1000 Kg for the coloured film, 500Kg for the transparent.

The minimum sheet side is : 150mm x 150mm, max. : 1600mm x 1200mm

The minimum width for a film below 180 $\mu$  : **20mm**, above 180 $\mu$  : **50mm**

External diameter of **800mm** for width more than 300mm, **600mm** for width down 300mm.

Internal core : 71mm – 76mm – 152mm.

For the film with a thickness more than 180 $\mu$  , the most important applications are Thermoforming, Blister, Box, Labels, Advertising print, Cooling tower and Technical Applications (embossed film, Pe complex, satined opaque, metalized film,...)

For all the films of thickness down 180 $\mu$ , the most important applications are Wine Caps, Labels, Windows for paper box, Seal for Guarantee and Metalized films.
