

TOPTOWER

FUME EXTRACTORS

TWISTER

The Twister power fan is made from tough mild steel and is finished in a hard wearing epoxy powder coating, to withstand the rigours of heavy industrial use.

The Twister power fan moves air at a phenomenal 4320 m³/hr and therefore is the perfect solution for most VENTILATING, COOLING & EXTRACTING requirements.

Ducting can be added to make fume removal easy and convenient.

By connecting a number of machines and ducts together the Twister Power fans can be used to extract or replenish air over considerable distances.

Twister & Ducting

APPLICATIONS

- COOLING
- TOOL HIRE
- WELDING
- FACTORIES
- FOUNDRIES
- JOINERY SHOPS
- SEWER RELINING
- & MANY MORE

CENTREX

The centrex is a multi functional air Blower / fume extraction unit which is powerful but compact.

The centrex is used extensively in the tool hire, sewer relining and welding industries and in fitting shops where petrol and diesel engines have to be tested and run for some time.

The Centrex will extract weld fumes, smoke, exhaust fumes and small quantities of dry grinding dust from most working environments, and with COSHH regulations being strongly enforced the Centrex is an essential item for environments where air contamination is common.

When used with ducting and the fume collection hood (with magnetic attachment) the Centrex enables convenient and portable extraction exactly where it is needed.

Centrex & Dust Bag

Technical Specification

	Centrex	Twister
Air Movement - M ³ / hr (CFM)	918 (540)	4320 (2500)
Diameter - Inlet/Outlet mm	150 (6")	315 (12")
Motor	1 phase ½ HP 0.37Kw	
Casing / Stand	Mild Steel	
Finish	Powder Coated Blue	
Weight	15 Kg	14 Kg
Dimensions (H/W/L) mm	310x310x375	450x310x400
Warranty Period	12 Months	
Ducting - PVC c/w Jubilee Clip	6m Lengths
