J B Corrie & Co Ltd.

Alarm Monitored Security Fence Specialist

JB Corrie & Co LTD have been a Gallagher certified Channel Partner for 20 years, JB Corrie can service your Site Survey, Proposal, Installation & Integration with other Access Control Systems

Integrated Alarm Fence

Powerfence™ is a pulsed energy fencing system offering a safe and legal deterrent performing to the highest legal standard, BSEN 61011.

The JB Corrie Powerfence is typically fitted to a carrier fence such as welded mesh or palisade, an existing fence on your site can potentially be adapted as a carrier fence.

JB Corrie Powerfence delivers to the would be intruder a safe electric shock when they come into contact with the fence wires, a persistent intruder after 3 consecutive pulses are interrupted, i.e. approximately 3 seconds will then trigger an alarm signal.

Powerfence Alarm signals are delivered back to the Cardax Powerfence Control software. Dependant on the clients needs and instructions the Alarm signal will notify the user, trigger CCTV or similar alarm notification

JB Corrie Powerfence has proven its success within the Commercial and Utility sector, a number of our clients have seen consistent attacks on a weekly basis on their sites reduce to NIL attack status once the Powerfence system is installed and commissioned.

Start protecting your property and assets today by calling or emailing JB Corrie.

JB Corrie Carrier Fence

Powerfence is typically installed to an existing suitable carrier fence or potentially a new JB Corrie carrier fence. The carrier fence can be clad in all types of security fence material such as welded mesh, palisade etc.
