

## Circulaire® Vertical Laminar Flow Fume Cabinet

The Fume Cupboard Company has partnered with leading experts to bring you the Circulaire® Vertical Laminar Flow Fume Cabinet.

Showcasing the latest advancements in air filtration technology. Fully compliant with COSHH regulations and international standards this Cabinet ensures ISO Class 4 clean air, offering superior product protection with advanced U15 ULPA filters.

Air is initially drawn through a high-performance, easy-to-replace EU4 pre-filter, efficiently capturing larger particles. It then flows through a fan system and passes through a U15 ULPA filter, which eliminates nearly 100% of particles down to 0.12 µm.

Size Specification (W x D x H)

VLFT 1000	VLFT 1200	VLFT 1500	VLFT 1800
1000mm x 721mm x 1195mm	1200mm x 721mm x 1195mm	1500mm x 721mm x 1195mm	1800mm x 721mm x 1195mm

### Why Choose the Circulaire® Vertical Laminar Flow Fume Cabinet?

- Airflow Monitoring in m/sec or ft/min.
- Audible and highly visual alarms should levels exceed specified limits.
- As standard, the cabinets conform fully to BS EN ISO 14644 and BS EN 1822.
- The Large Working Aperture allows for easy work area access
- Fitted with the Visionaire® Touchscreen Control System for control and monitoring of all aspects of product operation.
- Optional UV light with electronically interlocked night door for ultimate operator safety.
- Filter Differential Pressure Monitoring.
- Eco-Mode allows the option to place the cabinet into Standby after a set period of inactivity.
