

Painting Pixels is a multimedia design studio, capable of producing any manner of digital media for broadcast, web and print. We work with many different design disciplines including, 2D graphic design and company branding, 3D animation and modelling and also 4D interactive design and E-learning. To bring you a complete and convenient design service, we also offer website design and web graphics for both brochure sites and e-commerce sites.

Please have a read through these pages to get a quick understanding of who we are, what we do and how we can help take your business, products or services to the next level.

3D Design and Animation

For TV, web and presentations. Visually demonstrate how your product, process or services work.

Graphic Design

Stand out with bespoke graphic designs, corporate branding, logo's and banners. All unique to represent your company

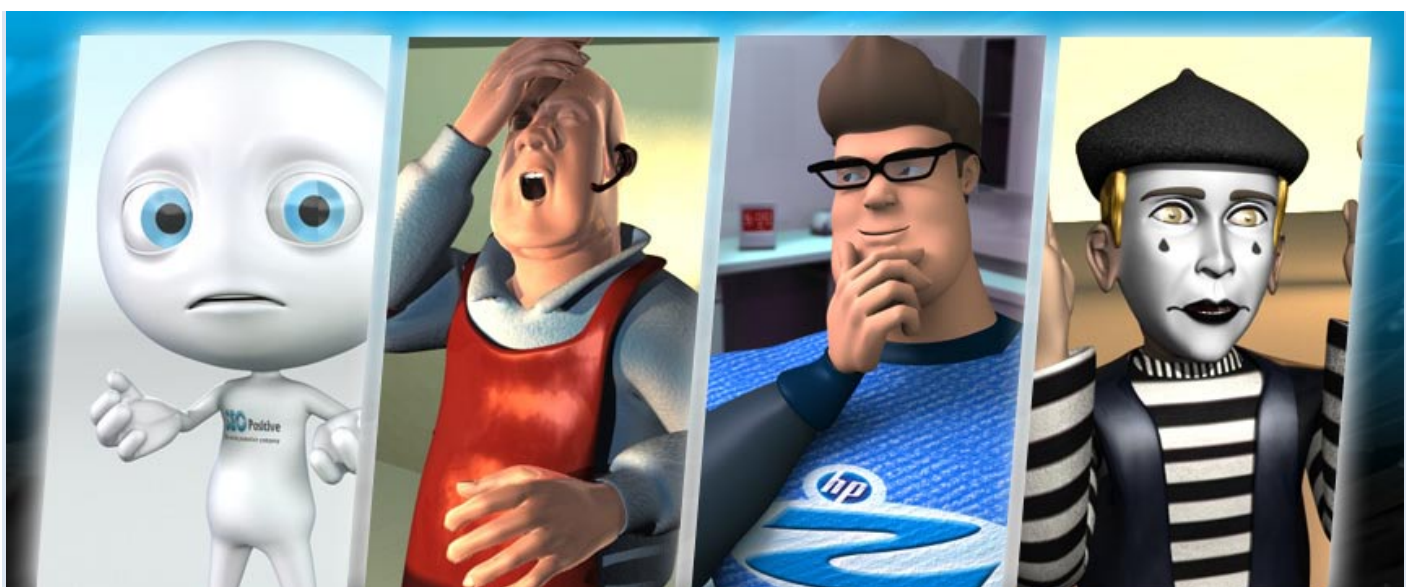

3D Industrial Design and Animation

For engineering and manufacturing companies to visually demonstrate an industrial product or process

3D Character Modelling and Animation

Give your business a face, a mascot or character for people to better remember and associate with your business

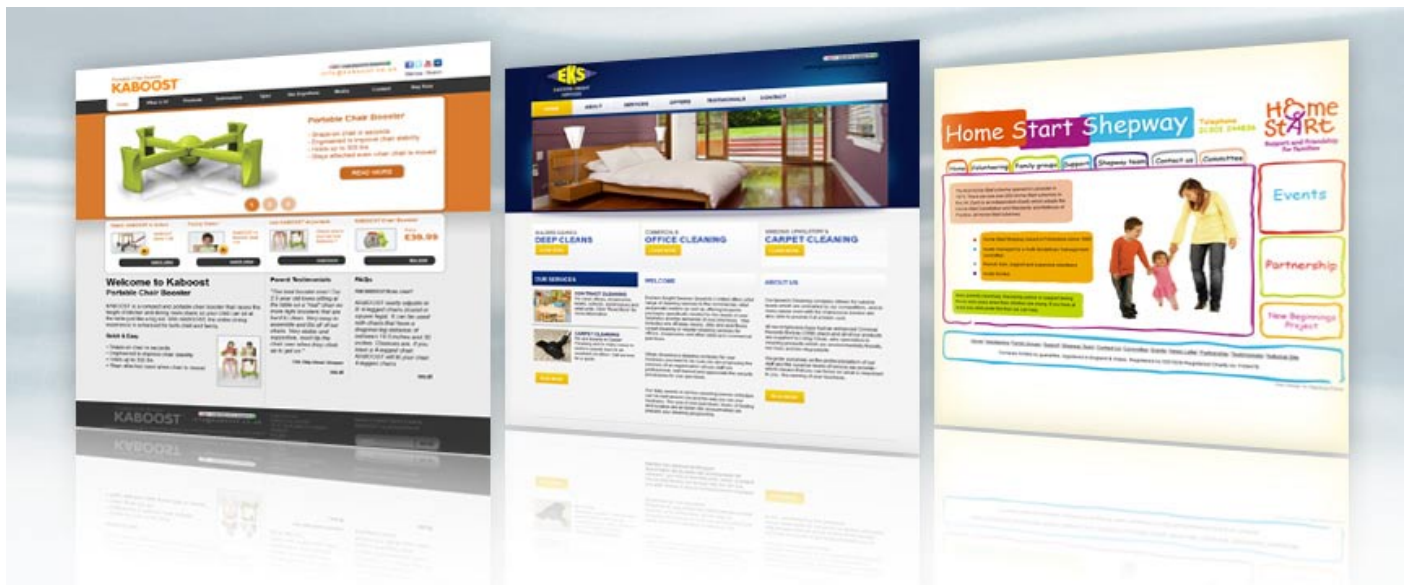

4D Interactive Animation

For product demonstration and interactive learning. Great for the medical, automotive and educational industries

Website Design

Bespoke brochure and e-commerce website design and graphics for businesses and local authorities

Architectural Visualisation

Visualise any building or environmental space in 3D, with animated flythrough to help with planning and public approval

3D Medical Design and Animation

For precision medical demonstrations and medical learning

3D Compositing

For believable visualisations for the building and planning industries.

So if you want to demonstrate a new product or process, want to describe your services in a more visual and easy to understand manner, or just want your advertising campaign to stick out from the crowd, then please give us a call today on **01473 857860**
