

### Jofra Dry Block Calibrators

Unique technology offering optimum dry-block performance

- 12 models temperature ranges -90 to +650°C
- Accuracy/Stability  $\pm 0.4^\circ\text{C}$  /  $\pm 0.01^\circ\text{C}$
- Models for Liquid, or
- RS232, and Jofracal Software
- External Sensor
- Interchangeable Multihole Inserts

### TBS1 Temperature Calibraton Bath

Easy calibration checks on food-use thermometers and probes.

- Temperature range:  $0^\circ\text{C}$  to  $+50^\circ\text{C}$
- Accuracy:  $\pm 0.2\%$   $\pm 0.1$  of reading

## CALIBRATION EQUIPMENT & SERVICES

# AMETEK®

# JOFRA™

# Digitron

### Temperature:

- Dry Block Calibrators
- Water Baths
- Process Calibrators for thermocouples, rtd's, mV, and mA

### Current/Voltage:

- mA Loop Calibrators
- mV and mA Calibration

### Pressure:

- Precision Calibrators
- Portable Pressure Calibrators
- Multi-function Hand Pump

### Service/Calibration

- Repair/ Calibration of instruments and temperature probes.
- UKAS Calibration Certificates
- In- house calibration against UKAS calibrated equipment

### Jofra Reference Digital Temperature Indicator and Sensors

A highly accurate and traceable thermometer for reference applications.

- Temperature range -200 to  $750^\circ\text{C}$
- Digital accuracy to  $\pm 0.004^\circ\text{C}$
- RS232 interface and JOFRACAL software
- Dual channel inputs
- Accepts Pt100/PT25 Rtd's

### DS1M-T Calibrator

Easy electronic calibration of digital thermometers with T or K thermocouple inputs. Preset calibration points

### MicroCal 20 DPC Calibrator

Rugged, hand-held, multi-function calibrator for most process parameters
