

## TEMPERATURE PROBES

THERMOCOUPLE  
RTD  
THERMISTOR

Established in 1980 we manufacture and supply Thermocouple, Platinum Resistance and Thermistor temperature

probes for demanding applications in a wide range of industries from Engineering to Pharmaceutical and Plastics to Food Retail or Distribution.

In fact most major pharmaceutical companies, food retailers and food processors in the U.K use Tempcon Instrumentation temperature probes.

Mineral Insulated, Fabricated or simple Exposed Junctions, probes are manufactured in a huge range of sizes and materials with cables and accessories to suit every application.

Most standard thermocouple types are available from stock, with special probes on short delivery. PT100 probes are manufactured to Grade A, and 2, 3 or 4 wire configuration. Thermistor probes require customer bead specification.

Handheld, Weatherproof Head, Fabricated, Exposed Junction, Needle, Surface, Liquid, Air, Autoclave, all probes are available on fast delivery and are supported by a wide range of 2-wire transmitters, thermopockets, connectors, cables and instrumentation products.

Our technical staff will help with all applications.

Our BS EN ISO 9002:2008 Quality Management System accredited by National Quality Audits Standard ensures consistency and all products are built and tested to National Standards.
