

BLOOD BANK

Our range includes blood bank refrigerators, plasma freezers, plasma thawers, platelet incubators and agitators, ultra low temperature freezers and a wire free temperature monitoring system.

We have partnered with leading manufacturers such as KW Apparecchi Scientifici, Evermed and Haier Biomedical to bring together a comprehensive range of innovative and high quality products which are the perfect addition to any modern blood bank and transfusion service.

BLOOD BANK REFRIGERATION

We offer a wide range of blood bank refrigerators with single and double refrigeration systems for the safe storage of whole blood and its derivatives.

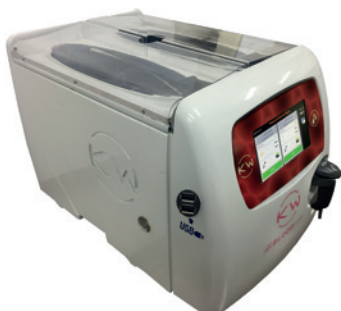

PLASMA FREEZERS

Perfect for the safe, long term storage of blood plasma and other biomedical products.

RAPID PLASMA THAWER

Rapid dry bath plasma thawer from KW Apparecchi, offering full futureproof connectivity and reporting and a validated 15 minute thaw time.

PLATELET AGITATOR AND INCUBATOR

Offering safe storage of blood platelets in a stable temperature controlled environment in a variety of configurations.

Incubators and agitators are available separately if required.

ULTRA LOW TEMPERATURE FREEZERS

Perfect long term cold storage for hospitals and laboratories in many sizes

WIRE FREE TEMPERATURE MONITORING

Our simple, low cost and easy to set up wireless monitoring system.

Packed with high end features and offering precise, 24/7 temperature monitoring, full reporting and alarm notifications.
