

LABORATORY

We have worked hard to bring together an extensive range of laboratory products which are also widely used in many other fields.

Our collection includes incubators, climatic chambers, chilled and cooled incubators, ovens and laboratory fridges and freezers.

LABORATORY INCUBATORS

The perfect solution to heated-only incubation studies of many pharmaceutical, microbiological and chemical elements.

COOLED AND CHILLED INCUBATORS

For stable temperature controlled environment requirements in laboratories

CLIMATIC CHAMBERS

Precise control of temperature and humidity, our climatic chambers from KW Apperecchi offer a combination of functionality and technology.

OVENS

Our extensive ranges of ovens offer accurate, stable temperatures for many industries and applications including laboratories, manufacturing, construction and many others.

Available in general purpose or bespoke size.

WAX MELTING OVENS

For safe melting of wax for histology specimens at temperatures up to 100°C.

LABORATORY FRIDGES AND FREEZERS

Offering stable, reliable storage of biological samples, reagents and other laboratory items.
Large range available.

WIRE FREE TEMPERATURE MONITORING

Our simple, low cost and easy to set up wireless monitoring system.

Packed with high end features and offering precise, 24/7 temperature monitoring, full reporting and alarm notifications.

LEAD LINED FRIDGE ENCLOSURES

The perfect solution to the storage of nuclear and radio pharmaceuticals
