looks and feels just like wood ...

This fabulous range of outdoor furniture is made from an amazing synthetic wood produced from recycled materials. The anodised aluminium frame is stylish and contemporary.

The top while looking and feeling like wood is made from mahogany effect synthetic wood, therefore is ideal for outdoor use. If left outside all year round this furniture will not discolour or deteriorate. One great feature unusual for outdoor furniture, is that after a shower or even a downpour, moisture does not soak into the table top or bench seat. Any surface water can simply be wiped away.

The top requires no treatment - so not only will you save time but your tables and benches will stay looking as good as new, year in, year out.
