

HAIGH

Why is Quattro the only bedpan macerator with a **THREE-YEAR WARRANTY** as standard?

The reliability of your bedpan macerator should be everything to you as only the most reliable macerator can play a critical role in your infection control strategy.

Quattro is the most reliable bedpan macerator you can buy because we engineered it to be from the outset. It's a critical part of your infection control strategy, has the lowest lifetime cost and is the only bedpan macerator with a three-year warranty as standard.

This is why...

- 1 Our highly skilled engineers use the latest 3D CAD technology. This allowed us to model the size and shape of Quattro to make it 32% smaller and 20% lower than any other macerator. And it allowed us to run simulation tests, so Quattro breaks down less than other macerators.
- 2 We use state-of-the-art equipment like a laser welder. This gives the size and shape of Quattro's hopper an accuracy we couldn't get anywhere else and that is an essential part of its reliability.
- 3 Our expert engineers manufacture more than 80% of Quattro's parts and assemble each machine in-house, giving us superior quality control.
- 4 We put Quattro through rigorous durability testing to make sure it is robust enough to withstand the demands of the busiest wards.
- 5 Our friendly and efficient service and support will help keep your Quattro running smoothly. Turn this page over for details.

We design, manufacture and assemble our macerators in-house, and have done for many years. This is where we stand out from our competitors. We know that reliability doesn't just happen. Reliability comes from skilled people, hard work, investment and experience. Reliability comes from Haigh.

Choose the best model and options to suit you

We'll be happy to help you.

DESIGNED, MANUFACTURED AND ASSEMBLED IN THE UK BY HAIGH
RELIABILITY AS STANDARD

If reliability and service are important to you, there's only one bedpan macerator worth considering.

Quattro lasts longer than other macerators and breaks down less.

You can help maintain this reliable performance by having your Quattro serviced regularly – we recommend twice a year.

And who better to service your Quattro than the people who know it inside out, because we designed, manufactured and assembled it.

"Haigh's first time fix rate here has been 100% and would definitely purchase again. We have just taken out an ongoing service contract for the next three years as we are so pleased with their service and support."

Wes Hutson
FACILITIES DEPARTMENT, CARILLION HEALTH

Our total service, spares and support cover *won't let you down*

SITE SURVEYS

We can check and report on the condition of all your macerators, helping make sure your assets continue to provide the best value for money.

SERVICE CONTRACTS

A well-maintained Quattro can provide reliable service for at least 10 years. Our range of service contracts start from as little as £17 per month.

TECHNICAL SUPPORT

We have a dedicated technical support team. Call us on 01989 760 230 or email service@haigh.co.uk with any macerator queries.

SPARE PARTS

Receive discounts on spare parts with one of our service contracts. We also provide a next working day delivery guarantee.

INSTALL AND COMMISSION

We can install and commission your new macerator, saving you time and making sure it runs smoothly from day one.

EMERGENCY CALL-OUTS

If you have any problems with your macerators call us on 01989 760 230. Our engineers are based nationwide so we can usually get to you by the next working day.

TRAINING

If you prefer to keep your maintenance in-house, we can train your team to service and repair your macerators to the same standard as our own engineers.

RETURN TO STANDARD

If you don't have a service contract we offer a one-off, return to standard service. We can replace worn parts and fix minor faults to help keep your macerators running smoothly.

No one knows our machines like we do. For expert servicing, information and advice call us on 01989 760 230 or email service@haigh.co.uk. We'll be happy to help you.

NEW SPARE MACHINE SERVICE

Every time a macerator breaks down the risk of an infection spreading goes up. You can help prevent this risk with our new spare machine service. Call us to find out more.
