

Intense Plastic Lockers

Description

Intense Plastic Lockers are designed to be durable and can be kept either indoors or outdoors.

This document contains details on every aspect of the lockers.

Manufacturing

Intense Plastic Lockers are rotomoulded from polyethylene and fitted with a unique RD4 cam which is 3mm thick and specially shaped. The door hinges can withstand 265kg of force. The lockers can be nested together, with corrosion resistant bolts using the pre marked fixing points.

Dimensions

Intense lockers are available in 3 different heights and all have the same width and depth:

| Height | Width | Depth |
|--------|-------|-------|
| 450mm | 320mm | 460mm |
| 600mm | 320mm | 460mm |
| 900mm | 320mm | 460mm |

Locker Stacking

Intense Lockers are designed to be stacked on top of each other to a max height of 1800mm. The lockers can therefore be combined to the maximum height in the following ways:

- 4x 450mm High
- 3x 600mm High
- 2x 900mm High
- 1x 900mm + 2x 450mm

Lockers can be combined in other ways, both in height and colour.

Intense Plastic Lockers

Colours

Intense Lockers are coloured using polymers. As standard they have Grey Carcass (equivalent to RAL 7035) and a choice of four door colours which are equivalent to the following RAL codes:

Lock Types

Intense Lockers have standard 2 lock types: Swivel Catch and Master built Cam Lock with 2 keys. The swivel catch can be used as a simple handle or can be used with a standard or combination padlock.

The shackle bar of the padlock should be between 5 - 7mm.

The key/cam lock comes with two keys and has 4000 differs. Our unique extra thick keys minimise the risk of snapping.

Black Master Keys which opens all compartments and Red Management Keys which replace the lock barrel are available.

Other lock types are also available such as: 4-digit Combination locks, coin return and coin retain.

Outdoor Use

Intense Lockers have the durability to be kept outdoors. However, they are not waterproof so if water ingress is a problem it is recommended that the lockers are installed under a canopy.

Features

- Intense Lockers have a warranty of seven years.
- The polyethylene material is fully recyclable.
- Drainage holes allow for hygienic washdowns of the inside and outside with a high pressure hose.
- 900mm high lockers have a double coat hook installed as standard.
