

S Fusion

- Aluminium Matte 
- Silver Aluminium 
- Atlantic Blue 
- Black 
- Champagne 
- F1 Red 
- Sky Blue 
- Snow White 

Technical Specifications

Voltage	Voltage 220/240v - / 50Hz
Power	600w
Net Weight	3Kg
Dimensions (D x W x L)	168 x 150 x 256mm
Noise Level	From 66dB at 1m
Cover Material	ABS Plastic Polymer

* Tech Spec subject to change without previous notice. ** Calculations based: on 150 uses a day | Based on manufacturer's stated figures.

The S Fusion pulls off the impossible, “an effective and comfortable user experience at low noise”

Overview

Innovation is in our DNA, the S Fusion continues that trend with the introduction of patented acoustic dampening system (ADS), creating a comfortable noise in which the user may effectively dry their hands.

The S Fusion remains eco efficient and uses only 600w of energy negating the use of a heating element, opting instead for our ecofriendly ‘heat transfer technology’ (HTT). Other options include HEPA filtration, giving the user hygienically cleaner air and the Zero-Gel fragrance system which increases the users washroom experience.

Interchangeable covers allow the user to simply change the colour or design of the hand dryer whenever they wish. Bespoke colours and designs are available.
