

PAL Extrusions has more than 25 years experience in custom designed thermoplastic profiles

Part of the PAL Group, PAL Extrusions use their considerable production expertise to provide rigid and flexible plastic profiles to meet a variety of end user requirements.

With over 20 extrusion lines and a 65,000 square foot manufacturing facility in the heart of the West Midlands, PAL Extrusions has a wealth of experience. This combined with a philosophy that strives for perfection alongside cutting edge technology ensures customer satisfaction.

An ability and willingness to innovate makes PAL Extrusions the chosen supplier for projects across the country. A twice a week delivery service throughout the UK enables customers to take delivery of the latest product – fast.

Independently owned, PAL Extrusions has the capability to diversify and a team that can offer tailor made products for specific projects, manufacturing products that are as diverse and individual as their customers.

In-house designers use the latest CAD technology to provide a complete design service.

From a model making facility to colour matching service, the team can provide the client virtually with the end result – before work has even begun!

From 1mm diameter monofilaments to 400 mm wide cap over board profiles, the quality and commitment to customer service is the key as the company's approval to ISO 9001 ensures.

Computer controlled extrusion lines enable PAL Extrusions to offer a wide range of products, from roofing to furniture shutter systems, through to fencing.

Experienced toolmakers operating modern wire erosion equipment produce a wide range of tooling from simple tubing to complex hollow profiles.

Whatever the requirement, PAL Extrusions have the knowledge, the flexibility and the capability to provide the best extrusions today – with tomorrow in mind.

CUSTOM PROFILES

The company specialise in the manufacture of large and small custom profiles, to tight tolerance specification. A continuous programme of capital expenditure ensures manufacturing processes are regularly enhanced.

We specialise in rigid and flexible PVC (including dual hardness profiles), thermoplastic rubber elastomers as well as polypropylene and polyethylene to offer functional solutions whatever the demands of the installation. This all contributes to a varied company portfolio working with industries as diverse as caravans to medical supplies and portable buildings to store fittings.
