ANNIVERSARY DEALS

Win a Sigma Select

Fifty years ago, we created the first Migatronic welding machine. Since then, we have sold more than 1,000,000 machines. Now it is time to celebrate them all - we call them the *living legends*.

That is why we turn to you, users and owners of Migatronic welding machines throughout the years. Find the serial number of the oldest functional Migatronic welding machine you can track down. Remove the dust of the past, drag the machine into the light and let it shine just one more time.

- 1 FIND**
YOUR MIGATRONIC
WELDING MACHINE
- 2 SIGN UP**
ITS SERIAL NUMBER
AT WWW.MIGA50.COM
- 3 SHARE**
THE AGE OF YOUR
MACHINE

The competition runs until 30 November 2020 in selected countries.

First prize! Sigma Select 400 Compact

The user or owner of the oldest functional Migatronic welding machine in your country

Second prize! RallyMIG

We draw the winner among all participants in your country

How old is your Migatronic?

After signing up your Migatronic welding machine, we will tell you how old it really is. Check out your fellow welders' machines on the leaderboard and see who has the oldest Migatronic machine in your country.

United Kingdom ▾	POS	LEGEND AGE	NAME	GAP
	#1	20 years 11 months	Alex T.	LEADER
Total welding machines registered	#2	15 years 5 months	John W.	5 years 6 months

Combined age of welding machines	#4	10 years 7 months	James C.	10 years 4 months
8460 years	#5	10 years 2 months	Dennis H.	10 years 9 months
Average age of welding machines	#6	8 years 10 months	Anna S.	12 years 2 months
10,8 years	#7	7 years 3 months	Jacob P.	13 years 8 months
	#8	5 years 1 months	Lisa T.	15 years 1 months
	#9	4 years 8 months	William D.	16 years 3 months
	#10	1 years 5 months	Chris V.	19 years 6 months

Share to get an extra ticket

You can share the competition with your friends and fellow welders on Facebook.

When you have shared, we will throw an extra ticket with your name on it into the RallyMIG draw. In that way, you get a better chance of winning a brand-new RallyMIG even though your Migatronic is not the oldest.

It all started in Denmark with an old car

The very first Migatronic was a CO₂ welding machine for repair of old cars. The oil crisis in the early 1970's increased the auto trade's interest in welding machines and boosted sales. The machine weighed 95 kilograms. Today, the smallest portable machine weighs only 4.9 kilograms. A 90.1 kilogram difference in weight!

We have always focused on making welding processes easier for welders. Inverter technology has replaced traditional transformer technology and today, software controls the arc. Inverter welding machines are lightweight and enable better control of welding. Mechanics has been gradually replaced by automatic software control. All of this makes welding easier.

We are proud to say that for 50 years, we have played a part in technological advances in the field of welding. In a time where climate and sustainability are seriously placed on the agenda, one of our top design priorities is to provide environmentally compliant welding machines that add value to our customers' businesses by increasing efficiency and saving energy.

ANNIVERSARY DEALS!

We celebrate our 50th anniversary
with great offers

AUTOMIG² 233i

There's a Migatronc Automig for every generation

Since 1970, as many as seven Automig welding machine generations have matched, each in their own way, the requirements for auto repair and light industry. The Automig²-i is stronger than ever. The machine is developed to meet the increasing demands for joining materials.

Automig² 233i

- ML 150 torch, 3 m
- Earth cable, 3 m
- 16 A plug
- Integrated trolley with cylinder holder
- Calibration certificate

Easy to use

Digital, synergic control panel with preset welding programs and automated functions. All you need to do is set wire dimension and material, and the Automig²-i will automatically adjust all other parameters.

High-performance

A flexible, high-performance machine. Energy-saving with less CO₂ emission. Long life of components – a machine built to last.

PI 250 AC/DC

Simplifies even the most advanced TIG welding jobs

Pi 250 AC/DC is a user-friendly welding machine, which meets every need for TIG welding. High-performance inverter machine for precision welding in mild steel, stainless steel, aluminum and other exotic materials.

PI 250 AC/DC

- Water-cooled
- Pulse function
- Prepared for remote control
- TIG Ergo 301 torch, 4 m
- Earth cable, 3 m
- 16 A plug
- Calibration certificate

TIG welding – simply easy

The intuitive, icon-based control panel makes it easy for you to operate the machine. A detail-oriented machine designed to make you perform your best.

The ultimate fixation

TIG-A-Tack is the ideal process for extremely small and precise fixations in austenitic stainless steel. The fixations are invisible in the final weld seam.

Faster AC welding

The D.O.C.[®] function (Dynamic Oxide Control) increases AC welding speed by 30%. Reduces the consumption of consumables and gas to a minimum.

SIGMA SELECT 400

State-of-the-art welding

Through years of experience and innovation, Sigma Select is designed for welding in a league of its own. It makes the most complex welding tasks seem easy, and it makes you capable of producing welds of the highest quality in every material – from mild steel to special alloys.

Sigma Select Compact

- Graphic control panel
- Water-cooled
- MV 450 torch, 4 m
- Flow control for protection of torch
- Earth cable, 3 m
- 32 A plug
- Integrated trolley with cylinder holder
- Calibration certificate

Make a smart investment

With Sigma Select you don't have to worry about the future. Throughout its entire service life, you can simply upgrade the machine with new intelligent welding functions as your needs change. Built to meet the future.

Customize to fit your needs

With Sigma Select you will have one welding machine, that you can instantly adapt to match your current production needs. Explore the possibilities.

Synergic

All primary welding parameters are linked and work together. Synergic includes a standard package of more than 50 welding programs.

Pulse

Perfect for stainless steel and aluminium because it provides spatter-free welding. Pulse includes Synergic and more than 50 welding programs.

- PowerArc - Secures maximum weld penetration
- DUO Plus - For a perfect finish
- Sequence – Tab your way to perfect settings
- Sequence Repeat - Invent your own arc
- MigaLog - Register every weld
- Miga Job Control - A clever digital memory

Terms and conditions

The competition

- You can only register green Migatronik welding machines.
- The winners must prove that they are the owner or user of an operational welding machine, with a photo of the machine and the serial number.
- The winners of a RallyMIG will be drawn at random among all participants in each country when the competition is over.
- Get an extra ticket by sharing the competition on Facebook.
- Prizes cannot be exchanged for cash.
- You can only participate in the competition running in the country you live in.
- Migatronik employees and their household members cannot enter the competition.
- The competition runs until 30 November 2020 in selected countries.

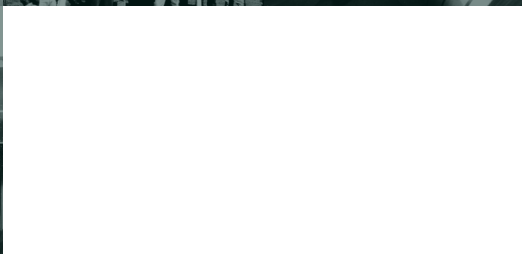

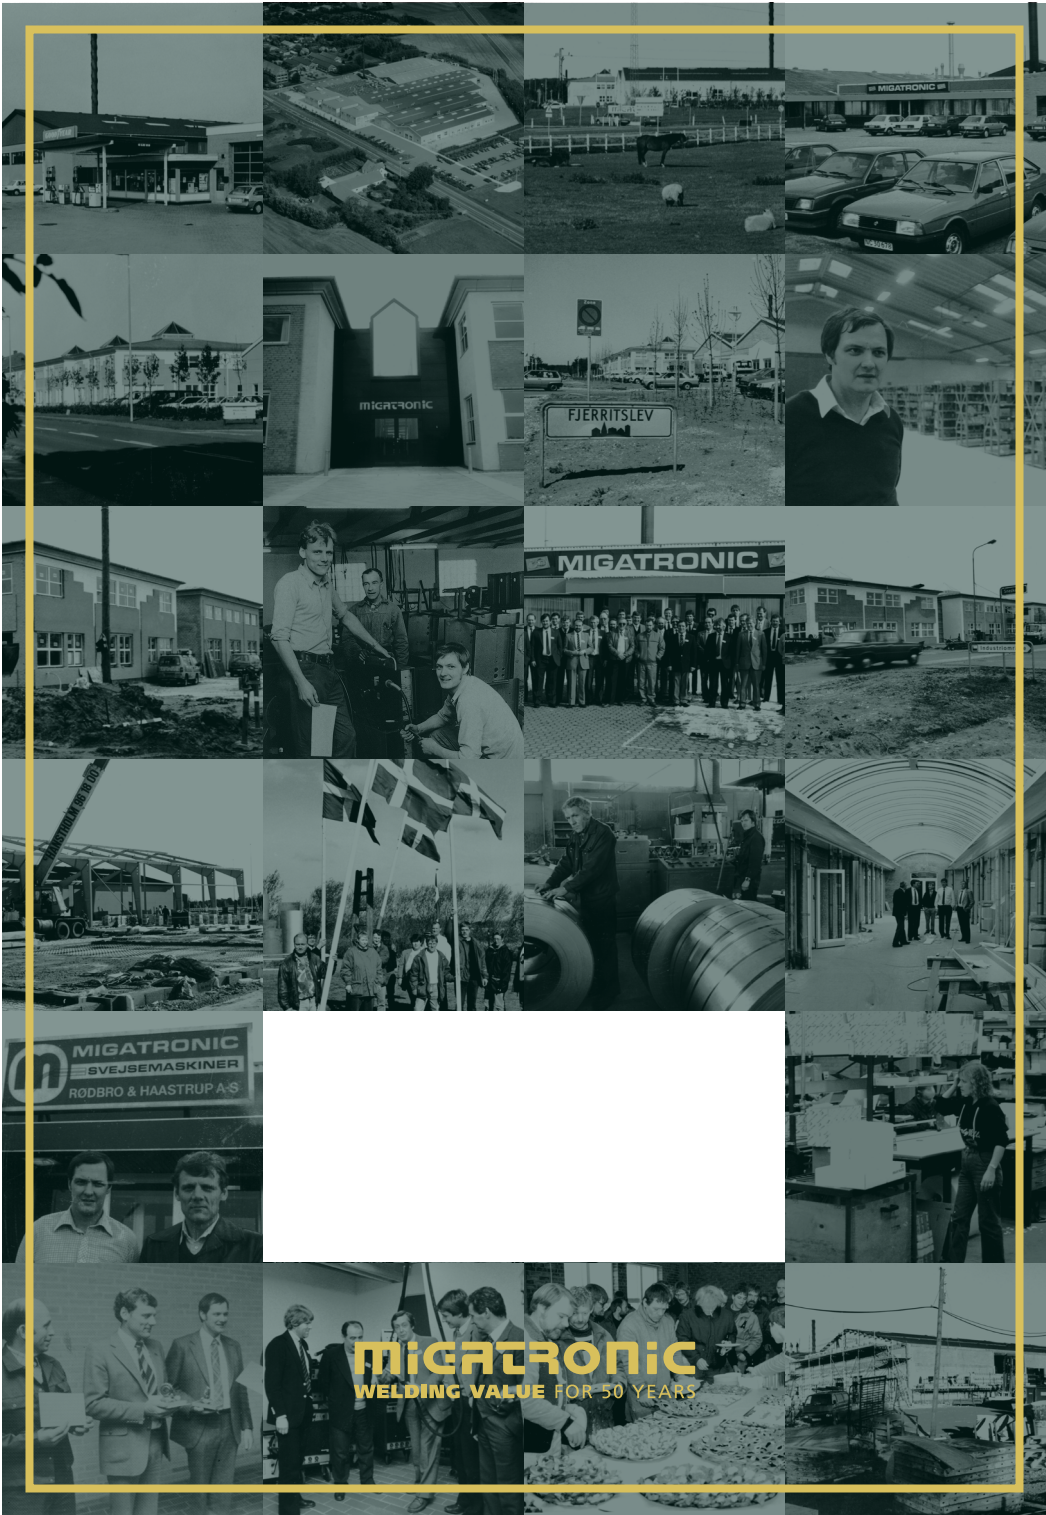

Anniversary deals

- Fixed machine specifications for each deal.
- Calibration certificate included.
- Extra FREE accessories included in deals only.
- Delivery terms: Ex works, Incoterms 2010.
- Prices are excl. VAT and WEEE.
- We reserve the right to make changes to prices and specifications and to make corrections in the event of a misprint.
- Valid until 31 December 2020.

Warranty

Register your machine at migatronik.com
and get up to 5 years warranty.
