ESCORT LITE

The Escort Lite has been re-designed with the expertise of health care professionals to address infection control, performance and durability. The chair is a semi-nesting portering chair with front wheel steer giving excellent manoeuvrability.

The seamless contoured seat and back make the Escort Lite very comfortable for the patient, while the ergonomically designed push bar and hand operated brakes make life easier for the operator.

When not in use, the chairs can be nested together to save space in reception areas where room for storage is often very limited.

The chairs are upholstered in flame retardant vinyl to BS5852, in the colour of your choice from the Chieftain range of fabrics, which have been proven to counteract against C.diff, MRSA and E-coli

Features

- Seamless contoured seat and back
