

PORTA 212

With a carrying capacity of 200 kilos (30 stone), the Porta 212 portering chair solves the increasing problem of transporting heavier patients within the hospital.

The Porta 212 has a very robust fully welded steel frame with baggage hooks, drop down arms for side transfer and a wide sliding footrest. It is also a semi-nesting chair, optimising space in out-patient and A&E departments.

The chairs are upholstered in flame retardant vinyl fabric to BS5852 in the colour of your choice from the Chieftain/Just Colour range of fabrics, which have been proven to counteract C.diff, E-Coli and MRSA.

ADDITIONAL OPTIONS:

- **MOULDED CALF SUPPORTS**
