The **only UK company** providing these **fully integrated services in-house**, eliminating the need to source **sub contract labour**.

- ✔ A Proven track record of cost savings up to 30%.
- ✔ Appoint Divisional Directors with a wealth of industry experience across all subcontracted packages, dedicated to your projects.
- ✔ One project team across the full scale of the contract, wholly committed to delivering successfully completed projects, on time and within budget.
- ✔ Less co-ordination across several different trades, helping to avoid delayed completion dates.
- ✔ Wide selection of industry leading partners.

"We have appointed Heightsafe across several projects and have been delighted by their professionalism, contract management and expert advice - which has saved us significant costs on site. The team have conducted roofing, cladding, lightning protection and fall protection installation projects for several of our landmark, large-scale sites, ensuring that there has been a seamless process at every step of the way."  
**- Vermont**

"Heightsafe have been a breath of fresh air. We placed a framework fall protection installation contract, compliance testing contract, lightning installation contract and major roofing framework agreement with them. Needless to say, the work has been top quality and delivered on time." - **DLR**
