

Chair & Bed Mat Monitors

The Fall Savers® Sentry+

The Fall Savers® Sentry+ is a versatile portable falls monitor for use with a bed, chair or a floor sensor pad. The monitor sounds an alarm when a person moves off the bed or chair pad, or steps on the floor pad. The Fall Savers® Sentry+ can either sound an alert locally, be integrated into an existing nurse call system or be used with an optional portable pager. This high quality monitoring system is an affordable tool for helping to manage persons of fall risk in your care.

Alert-it P163 Monitor

A discreet sensor that detects the weight of the person lying in bed, or sitting in a chair. An alarm is raised either immediately on vacation, or after a prolonged period of vacation. A unique feature is that if reset whilst the user is out of bed or a chair, it will stop detecting alarms until the user returns later. The occupancy mat can be changed for various other styles of sensor to suit the users need, please ask for details.
