

Master Bond Inc.

Adhesives, Sealants and Coatings

Epoxy Adhesives

Master Bond Inc. is a leading manufacturer of high performance epoxy adhesives, sealants, coatings, potting/encapsulation compounds and impregnation resins. Epoxies are our most versatile group of thermosetting polymers and can be two component room temperature curing or one part heat and/or UV curing compositions. They feature high physical strengths, superior resistance to chemical and/or environmental damage and excellent dimensional stability; are

widely employed for structural adhesive applications and as electrical insulation materials. Special formulations are available which feature high electrical and/or thermal conductivity as well as wide service temperature ranges.

If a compound is not available in our vast product line to meet your requirements Master Bond Inc. will promptly formulate one. This may include the redesign of an existing product or the development of a new composition.
