

Cut-out & Fabricated Letters

► Features

- Wide range of materials available
- Ideal for reinforcing corporate identity
- Enhances building exteriors
- 3-D effect
- Can be illuminated
- Large choice of finishes
- Eye-catching relief effect
- Elegant and stylish

Cut to shape and built up fabricated lettering provides an elegant and stylish signage solution. Individual profile cut letters and sign panels are manufactured from a wide selection of materials such as:

- Stainless steel
- Anodised aluminium
- Brass
- Acrylic
- MDF
- Vinyl
- Polystyrene

Whether laser cut or routed the result is a three dimensional sign which can significantly enhance visual impact. Colour finishes can be matched to your own specific requirements. The extra dimensional appearance of for example the profile

cut lettering with illuminated options for example halo effect illumination and inlaid colours makes this a preferred type of signing for many different commercial building and retail premises fascias.

Built up brass letters
