

# Plant, vehicles, machinery and tools

## Soft Service Inspection Tag

Soft Services Inspection Tag system provides you with all the tools you need to inspect, maintain and improve safety in the workplace. Display vital pre-use safety and instructional information for domestic equipment with this simplistic, efficient, water and chemical resistant, tagging system.

- Ease of use and visibility ensures regular inspections are carried out
- Help create and control regular inspections, maintenance and identification of domestic equipment
- Remove the insert and the holder alone puts the asset immediately into prohibition with a "DO NOT USE THIS EQUIPMENT" status
- Holder is permanently attached to the equipment in a prominent position with either a cable tie, adhesive, screw or rivet

### Holder

- Dimensions: 210mm (height) x 55mm (width)
