

Plant, vehicles, machinery and tools

Vehicle Tag

Company used vehicles are working areas. As such, under the Provision and Use of Work Equipment Regulations 1998 (PUWER), it is important that company vehicles are maintained in an efficient state, good working order and in good repair.

Use the Vehicle-tag inspection insert to help control pre-use checks, inspections, maintenance and identification. The insert contains an easy-to-follow pre-use operator checklist on the front and the facility to record up to 32 inspections on the reverse.

- Help create and control pre-use inspections, maintenance and identification of vehicles
- Holder and insert are very flat and are easily stored in the side pocket or glove compartment
- Ease of use and visibility ensures daily inspections are carried out

Holder

- Dimensions: 171mm (height) x 131mm (width)
- Material: ABS (Acrylonitrile Butadiene Styrene) thermoplastic
- Temperature Range: -5 °C to +65 °C
