

PRODUCT DESCRIPTION

Complimenting the safe surface temperature offer, Contour metal pipe boxing is a robust product with a flawless finish. Totally recyclable and sustainable, access panels for internal services can be programmed into manufacture, allowing a fast, clean, low disturbance installation.

Contour metal pipe boxing is designed and fabricated using the latest British engineering technology, delivering a product pure in form and consistency, with a 3D CAD design facility used for client approval.

Venting which delivers safe surface temperatures can also be programmed into manufacture without compromising the lead time.

The smooth, modern finish of the pipe boxing enables easy cleaning and maintenance, alongside a professional aesthetic. While the one-piece construction of the pipe boxing removes the presence of dirt traps.

Contour metal pipe boxing excels in hostile environments and is impervious to insect / rat attacks.

MANUFACTURE

Contour metal pipe boxing is manufactured from 1.2mm Zintec Mild Steel.

Fabrication takes place at Contour's centrally-located facility, ensuring complete stock control, short lead times, quality control and reliable delivery.

SIZES

Pipe boxing is supplied in standard lengths of up to 3000mm and with heights and depths of up to 500mm and 300mm respectively.

The flexibility of the range allows a wide choice of shapes and angled corners to be fabricated.

ACCESSORIES

A range of accessories are available for Contour metal pipe boxing, including stop ends and welded internal / external corners. Security fixings can be provided for secure environments.

TECHNICAL

Contour metal pipe boxing is manufactured from 1.2mm Zintec Mild Steel to BS EN 10152, grade DC01, coating reference 25/25.
