

CASE STUDY

THE SPINNEY PRIMARY SCHOOL – CB1 9PB

SOVEREIGN
Bringing Imagination into Play

I was asked to visit my local school, The Spinney, as they had a very old trim trail with old wetpour pads that had now become a safety concern. We discussed the project at length and decided to replace the trail and lay new bonded rubber mulch surfacing over the existing wetpour rather than having the high cost of removing it. We also agreed to link all the trail items rather than having gaps which they did originally, and we also created a path leading to the equipment from the playground.

>> FEEDBACK

Why did you choose Sovereign for the Project?

"After approaching several providers to quote for the project, we felt that Sovereign had the better understanding of our needs. They also proved to be the best value for money too with a good quality, guaranteed product. Our area manager also has a good reputation with other local schools."

What made Sovereign's design better than any others you received?

"The design was realised after closely listening to our needs and included a good variety of equipment which we were able to choose ourselves to offer a range of challenges for children of different ages."

How did you find the design process?

"We appreciated how clear each iteration of the design was, and it was very easy to understand what was and was not included in the price."

How did you find the installation process?

"Really straightforward with good communication. The children loved seeing it all being built!"

How was your overall experience and any suggestions for improvement?

"It all went very smoothly, we never thought we'd be able to get it all installed before Christmas. We had a "grand opening", and the children have been enjoying it very much!"
