

New

VERSALINE HYGIENIC CENTRIFUGAL PUMP

In a world where ever increasing pressure is put on our customers to keep costs down, our Versaline range offers low initial cost AND low running costs.

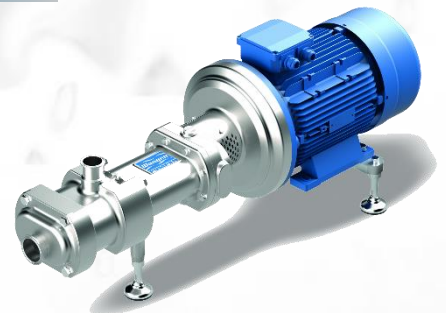

The NEW Versaline VCP hygienic pumps do just that. With standard mechanical seals, ABB motors, stainless steel shroud and adjustable feet, this brand new range offers flowrates from 5m³/hr to 273m³/hr and delivery heads up to 115m.

This pump is suitable for Dairy, Beer, Beverage, Pharmaceutical and Chemical industries. **Our smallest pump, the VCP5 0.37kw pump starts at just £662.00**

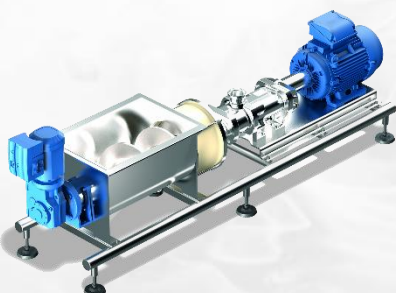

VERSALINE TWIN SCREW RANGE

Our Twin Screw pump is setting the standard for positive displacement pumping in the food industry, now we have added the Vario Twin.

A new patented screw feed hopper that bolts to our Twin Screw Pump allowing customers to feed thick, sticky solid laden products without the problems associated with progressing cavity style pumps.

The Twin Screw and Vario Twin are both suitable for Cleaning In Place (CIP).
