Introducing: Borealis®

Why should you move your access control solution to the cloud?

www.kerisys.com   **+800-260-5265**
The best bits:

- No more software. Borealis is browser-based and accessible from anywhere.

- No need to update software or run a backup ever again.

- Access multiple locations without the need for VPNs or complicated networking.

- Allow multiple operators to log in and make changes at the same time.

- No more software licenses.

- Put an end to disruptions caused by server or computer problems.

- Keep your data secure and backed up with a guaranteed 'up' time of 99.99%

- Eliminate expensive servers and the restraints of a virtual machine.

- Increase business efficiency and flexibility with a completely modular solution.

- New features can be added without any additional installation or downtime.

- Make changes or view events in an emergency without being physically present.

- Automatic updates mean you always have the latest version of your software.

A cloud based database is always accessible and cannot be lost

In most cases, you can reuse your existing readers and credentials too

Worried about converting?

Our conversion tool makes the transition easy

Step 1
Create your Borealis account

Create an account to manage your Borealis system via your browser.

Step 2
Use the conversion tool

Select the Doors.NET database you want to transfer and let the conversion tool do the hard work.

Step 3
Log into Borealis

Your access control system has been converted. You can now log into your new cloud solution.

It really is that easy

Should you choose the cloud?

Benefits and reasons to consider a cloud solution

COST EFFECTIVENESS

By moving your access control solution to the cloud, you no longer have to worry about servers and dedicated computers. While they are not a bad option, you will always run the risk of hardware failure, or worse, data loss in the case of a catastrophic event such as a fire. In these circumstances, you may need to replace the server and convert your system, or rebuild your system completely, which would cost you hours of time and money.

Cloud solutions save you money by reducing overheads on hardware and server rentals, IT personnel, server maintenance or updates, and staff training.

SCALE ECONOMICALLY

Borealis has been designed with facility owners and managers in mind, offering very simple scalability; you can add a single reader or expand multiple doors at once.

With Borealis you will not need to worry about full hard drives or backup storage. For peace of mind, your data is stored on a flexible cloud solution that can scale up and down with your system size.

Doors.NET to Borealis conversion is free of charge, Borealis itself is a subscription-based service.

Should you choose the cloud?

Benefits and reasons to consider a cloud solution

DISASTER RECOVERY

Data loss is not an option. Besides being extremely frustrating, losing data can also be very costly to your business in terms of time, repairs, and it also defeats the purpose of your access control system. Proactive security assists with unsanctioned residents or occupants, prevents re-keying, and identifies problematic employees, as well as providing general business assistance.

Borealis stores your data on ultra secure Amazon Web Servers, which boast 99.99% 'up' time. This means that your data is always secure and readily available when you need it. No need for backups. No need for software updates. Just more control.

EASY TO USE

Borealis allows you to **connect to and monitor your access control system from anywhere in the world** with internet-connectivity. It has been designed with device-friendliness in mind and the user interface is completely responsive. With the ability to scale to your device, whether it's a mobile, tablet, or PC, Borealis optimizes itself to present the best user experience for your device. This makes it the most convenient and user-friendly access control solution available.
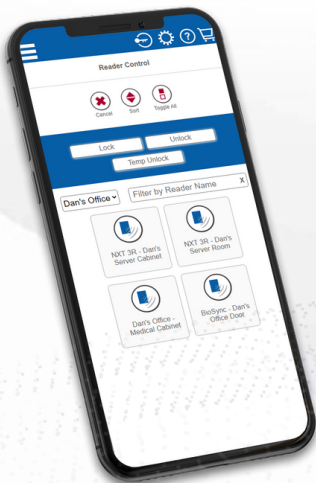

Absolute peace of mind

MAKE LIFE EASY!

EASY TO INSTALL, EASY TO USE

BOREALIS

Connect your security installations to the cloud. Simplify access control connectivity, deliver global accessibility, scalability, and convenience without the need for a dedicated server or client machine.

A CLOUD SOLUTION WE KNOW YOU WILL LOVE

Borealis is compatible with Keri NXT family hardware, which means there's no need to learn anything new. Using a cloud based solution means no manual software or operating system updates and no fear of hardware failure or expensive data-loss.
ULTRA SECURE STORAGE

Our Aetheros platform uses Amazon Web Services (AWS) for fast and secure performance delivering global accessibility, scalability, and convenience to backup your databases.

powered by aws

Cloud Hosted Storage

Access From Anywhere

WORRY FREE ACCESS CONTROL

Borealis is a cloud-based solution, managed from a web browser, therefore you can log in and manage your access control solution with ease from anywhere with internet connectivity.

DESIGNED FOR RESPONSIVENESS

Borealis has been designed for precise scalability across multiple device types, allowing you to access your Borealis configuration via a web browser on your mobile device, tablet, or PC. The design is minimalistic to ensure that all aspects of the UI can be accessed easily on mobile devices.

DON'T OVERCOMPLICATE

When using an access control solution on the go, you shouldn't have to deal with complicated menus and difficult navigation. Borealis eliminates these frustrations with a streamlined and intuitive user experience, wherever you are and on whatever device you use.

Not every cloud brings rain

Upgrade path from Doors.NET to Borealis

WHY UPGRADE?

Connect your security installation to the cloud. Simplify access control connectivity. Harness the power of scalability and convenience without the need for a dedicated server or client machine.

IT'S EASY

Seamless transfer of your Doors.NET database. Our conversion tool will transfer your existing configuration.

IT'S EFFICIENT

Benefit from continual system improvements and automatic software updates.

Move away from software & servers

Borealis only requires a hub and an internet connection. As it is a browser-based management suite, there is no software to install on your computer.

Use existing equipment

With Borealis you can continue using all existing access control NXT hardware (controllers, readers, etc) and credentials.

A more secure experience

The database is in the cloud and so it can never be lost. Even if the hub has a catastrophic failure, the database will not require recreation.
