- Links a visitor to the resident who allowed entry
- Two selectable and assignable output relays, heavy-duty door relays
- Telephone entry units and access control units can be combined on a single network for a total of 128 controller units
- Stores up to 3,640 events, manages up to 255 individual sites
- Flexible connectivity to host PC: RS-232, Modem, TCP/IP
- Weather and vandal resistant housing
- Programmable talk time, tone dialing, adjustable volume
- Quick disconnect terminals, built-in surge protection, non volatile memory
- Two Mylar™ speakers with superior sound
- Door forced open and door held open alarms
- Powerful *Doors™* Access Control Software with full access control features: time zones, temporary users, online programming, operator security levels, multiple site management and automatic configuration

EGP-5000

The *Entraguard Platinum* is the newest in Keri's telephone entry product line, with the largest capacity and biggest display Keri offers. The *Platinum* has a 5,000 tenant capacity, more than enough to handle nearly any large commercial or residential project, and also has two large font sizes, adjustable on demand by the visitor. This entry panel is available at a price well below competitive large capacity systems on the market. A no-phone-line system is available as an option.

The *Platinum* is designed to be durable and weather resistant, with a tough, 14-gauge, stainless steel enclosure. Additionally, the *Platinum* can be fitted with a *PXL-500 Tiger Controller* and *SB-593 Satellite Expansion Board* to provide a 1 or 2 door card access system within the same unit.

Like its sister products, the *Entraguard Silver* and *Titanium*, the *Platinum* provides the best telephone entry/access control marriage by letting the unit function as a node on a *PXL* controller network, putting both applications under the acclaimed *Doors™* software umbrella for a seamless integration of the two. Each *Entraguard Platinum* also has two extra relay outputs that can be used in a variety of ways, including turning on a lobby light, unlocking an interior door, or providing access to two separate entrances, by different tone commands from the tenant's location or based on an access granted decision. An on-board modem is also included for remote programming.

Entraguard™
