US Rev 1.0

A little about Keri Systems, who we are, and our friendly ethos.

# About Keri Systems

Keri Systems is an access control manufacturer and solutions provider, operating through the relentless pursuit of quality, technological innovation, and unparalleled customer service.

Industry-leading  
manufacturer

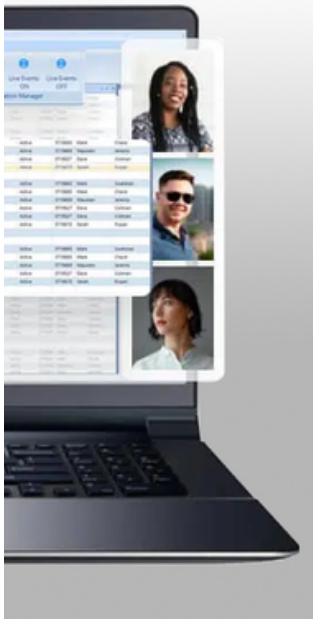

We operate all  
around the globe

World class  
technical support

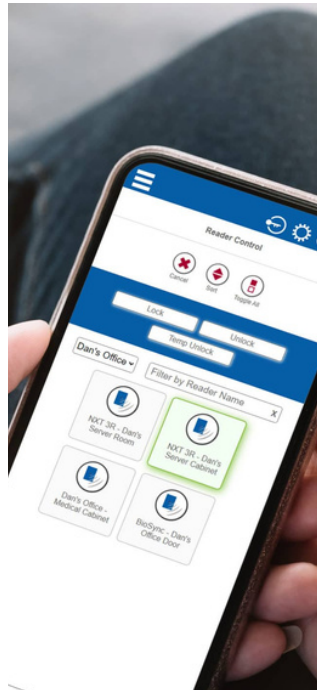

Over 30 years  
of experience

## Client-Server

Doors.NET is our server based access control solution. It is designed with ease of use and integration in mind. Doors.NET provides a user-friendly experience while maintaining power and flexibility.

Harness advanced features such as global lockdown, custom macros and in-depth reports.

## Cloud Solution

Borealis offers secure and flexible access control from the cloud. Created with accessibility in mind, Borealis allows users to control their security remotely.

Use any device with an internet connection to sign in to the cloud, run reports and manage users from anywhere in the world.

## Wireless locks

Wireless locks allow for easy management of high traffic areas and are especially useful in hotels and residential apartments.

Our Doors.NET software integrates with multiple variations of wireless handle sets ensuring maximum customization for your site.

## Video

Our video surveillance and CCTV integration partners provide enhanced security and monitoring capabilities with advanced playback features.

Doors.NET seamlessly integrates with multiple video partners, bringing CCTV and access control together.

# Doors.NET

Client-Server, On-Premise Solution

## GET STARTED WITH DOORS.NET

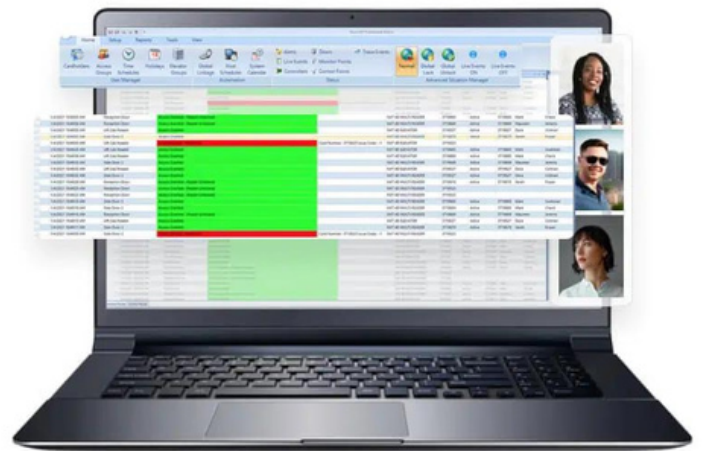

Enjoy powerful control software that lets you manage and monitor installations of any size — whether you're securing 3 doors or 30,000.

## CUSTOMIZE YOUR ACCESS CONTROL SOLUTION

Organize your security to suit you. Customize features such as reports, access rights, language, layout, and user-defined alerts.

## EVENT REPORTING

In-depth reports give peace of mind and provide accountability for all users. Use live events to see real-time movement, customize reports and see software and hardware diagnostics.

## AUTOMATED ACCESS CONTROL FEATURES

Doors.NET gives access to enterprise-level features such as elevator control, timed access schedules, photo badging, local linkage, and anti-pass back.

## ACCESS CONTROL MANAGEMENT TOOLS

Manage your access control with multiple tools available in the Doors.NET software. Ensure smooth operation of high-traffic facilities by using visitor management & time-in-building reports. Use our integrated graphic map to view and monitor your security in real-time and lock down the building with a single button press with global lock.

# Software additions

Managing and monitoring doors made simple

## DOORS.NET

Designed with ease of use and integration in mind. Doors.NET provides a user-friendly experience while maintaining power and flexibility.

Doors.NET acts as our client-server solution for security and access control.

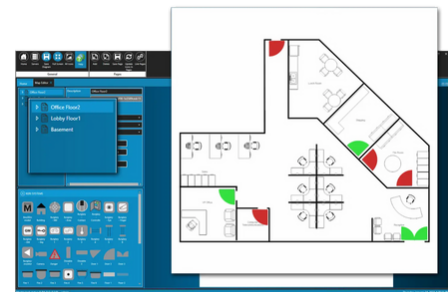

## VISUAL DOORS™

Graphically access the most commonly used features of Doors.NET. Visual DOORS is Keri Systems' answer for those looking for an access control system with powerful software and abundant features, yet simplified, the way you've always envisioned it.

## TELEPATHY™

Keri's Telepathy is a powerful, graphical mapping, command and control client that is enabled, free of charge, for a single site with the purchase of Keri's Doors.NET access control software.

# ALL-IN-ONE ACCESS CONTROL

Monitor and manage access to doors, elevators, and more. Automate your installation with customized schedules, alerts, and reports.

## Ensure your installation's hardware is supported

Doors.NET supports IP-based NXT, PXL-500, authentic Mercury Security, and wireless locks from Simons Voss, Allegion, Schlage, Assa Abloy, Dormakaba and more.

## Choose standard edition or professional edition

Choose Standard Edition or Professional Edition. Standard Edition will handle the majority of uses and can always be upgraded to the Professional Edition.

## Install at your preferred management locations

The software can be installed on standard Windows and server operating systems, or in a virtual environment.

## Expert technical support

Our expert technical support is always available should you need assistance with installing, configuring, or managing your software.

# MAKE LIFE EASY!

EASY TO QUOTE, EASY TO  
INSTALL, EASY TO USE!

## BOREALIS™

Simplify access control connectivity, deliver global accessibility, scalability, and convenience without the need for a dedicated server or client machine, Connect your security installations to the cloud.

## A CLOUD SOLUTION WE KNOW YOU WILL LOVE!

Compatible with the Keri NXT family hardware, which means there's no need to learn anything new, all whilst utilizing the benefits of a cloud-based solution with no manual software or operating system updates, and no fear of hardware failure or expensive data-loss.

## ULTRA SECURE STORAGE

Our Aetheros platform uses Amazon Web Services (AWS) for fast and secure performance delivering global accessibility, scalability, and convenience to backup your databases.

Cloud Hosted  
Storage

Access From  
Anywhere

## DESIGNED FOR RESPONSIVENESS

Borealis has been designed for precise scalability across multiple device types, allowing you to access your Borealis configuration via a web browser on your mobile device, tablet, or PC. The design is minimalistic to ensure that all aspects of the UI can be accessed easily on mobile devices.

## DON'T OVERCOMPLICATE

When using an access control solution on the go, you shouldn't have to deal with complicated menus and difficult navigation. Borealis eliminates these frustrations with a streamlined and intuitive user experience, wherever you are and on whatever device you use.

# Create repeat business opportunities

Upgrade path from Doors.NET to Borealis

## WHY UPGRADE?

Connect your security installation to the cloud. Simplify access control connectivity, harness the power of scalability and convenience without the need for a dedicated server or client machine.

## IT'S EASY

Seamless transfer of your entire Doors.NET database. Our conversion tool will transfer all the existing data for you.

## IT'S EFFICIENT

Benefit from continual system improvements and automatic software updates.

Move away from software & servers

Borealis only requires a hub and an internet connection. Because it's a browser-based management suite, there is no software to install on your computer.

Use existing equipment

Allows you to continue using all of your existing access control NXT hardware (controllers, readers, etc) and credentials.

A more secure experience

The database is in the cloud and so it can never be lost. Even if the hub has a catastrophic failure, the database will not require recreation.

# INTEGRATE A WIRELESS LOCKING SOLUTION WITH AN EXPERIENCED PARTNER

# VIDEO INTEGRATIONS

Integrate your favorite video management systems with a Keri access control solution

# NXT-MSC MERCURY POWERED TCP-IP CONTROLLERS

- ✓ On-Board TCP/IP Connectivity
- ✓ 185,000 Cardholders, 50,000 Event Buffer
- ✓ Credential Types Library and Wiegand Format Builder
- ✓ IO 4X4 Expandable
- ✓ Controller Continues Operation When Offline
- ✓ Embedded MAC Address for One Button Auto-Configuration
- ✓ Elevator Control Option Available

## SAVE TIME AND MONEY WITH EASY INSTALLATION

By using an existing TCP/IP network, controller cabling costs can be eliminated. Or, if building a new network, they can be reduced up to 50% over traditional hard-wired access systems by using inexpensive CAT-5 cable. The NXT-MSC 2D/4D is designed to be extremely intelligent with little reliance on network traffic for decision making, allowing it to be thrifty with any network's valuable bandwidth. With Ethernet functionality built directly into the controller, Keri's proprietary MAC addressing scheme allows for reliable hardware discovery and true one-button auto-configuration.
