**Dries Hands in
9-10
seconds!**

Introducing our New Generation of High Speed Eco Hand Dryers

High Performance drying and reduced carbon emissions
Don't destroy trees drying your hands!

Save Power, Save the Environment, Save Money

Quick Dri Eco 350 Jet Stream

Designed to provide a cost effective alternative to hand drying these new dryers have been developed with speed in mind. They provide a rapid drying time, it takes just 9-10 seconds to dry the hands from 'dripping wet' to 'bone dry' - almost a third of the time of competitors products, thus reducing washroom time. Quick Dri Hand Dryers offer the user up to 85% energy saving when compared to conventional hand dryers.

The unique design boasts an additional feature, the heater element can be set to between 450 and 900 watts enabling the unit to be used in complete safety for the disabled, young children and the elderly. Another feature is the blue L.E.D light which provides a visible indication of the drying zone ensuring that the user's hands are always in the warm air stream.

The Model 350 is available in White and Bright or Satin Stainless Steel

TECHNICAL DETAILS

Functioning	Automatic operation
Power Supply	110/120 volts 220/240 volts 50/60Hz
Motor Type	350-700w, 1200-1800RPM, brush type dual ball bearings
Motor Thermal Protection	Auto resetting thermostat turn unit off at 105 degree C
Warm air speed (adjustable)	79-100m/s (169-225 mi/hr)
Heater Element	450-900w, adjustable; Heater Thermal Protection; Auto Resetting Thermal Stat turns off at 85 degree C (186 degree F)
Drying Time	9/10 seconds
Circuit Operation	Infrared Automatic, self adjusting
Sensor Range	51mm tp 330mm (2" to 13") adjustable; standard 180mm +/- 20mm (7")
Timing Protection	60 seconds auto shut off: Drip proof: IPXJ Isolation: Class 1
