

Digital Panel Indicators

Reliable, proven, 1/8 DIN Tracker series Indicators offer a host of features to meet the demands of industrial measurement.

- Universal, dedicated, or status (logic) inputs.
- Transmitter/sensor supply.
- Analogue, Relay or Retransmission output
- RS485, Modbus, or Ascii

- Tracker 210 **Universal Input**
- Tracker 220 **Universal Input**
- Tracker 212 **Tank Contents**
- Tracker 240 **Load Cell**
- Tracker 250 **Melt Pressure**
- Tracker 260 **LVDT Indicator**
- Tracker 280 **Counter, Timer, Frequency**

Tempcon Thermocouple, Thermistor, & RTD Temperature Probes are manufactured to BS EN 9001:2008 to meet every measurement

A wide range of 3,4,and 5 digit Panel Indicators in 1/32, 1/4, 1/16, and 1/8 DIN panel sizes with alarms, retransmission, and communications output (depending on model)

Inputs for:

- Temperature (thermocouple, Rtd, thermistor)
- Current (0 – 20 mA, 4 – 20 mA)
- Voltage (±10V)
- Pressure
- Load Cell
- Potentiometer
- Frequency
- Tachometer
- Chronometer
- Counter
- Totalizer
- LVDT
- Relay

Outputs:

- Relay
- RS232/485
- Retransmission
- Analogue
- Transmitter/Sensor Supply

Low cost, proven and reliable range of indicators which meet the stringent, and flexible, requirements of industrial applications.

- The range includes:
- 3,4, and 5 digit displays
 - Inputs for thermocouple, rtd, voltage and current.
 - Outputs for relay, SSR, Triac, or linear mA/V DC

2100i Indicator Range

- Reliable
- Accurate
- Simple to use
- Universal inputs
- Communications
- 1/32, 1/16, and 1/8 DIN panel sizes
