cronus support-optimised with recessed supporting legs, in cappuccino 1117

cronus Cubicle system

cronus is the cubicle system which unites design, and robustness with flexibility. Door and panel elements consist of 13 mm thick water-resistant solid grade (HPL) laminate panels with straight-lined profiles made of satin anodised aluminium. In addition to the coloured decorative layer a special overlay protects from wear, and abrasions as well as scratches. cronus is suitable for wet, humid and dry areas. Due to the intelligent construction

cronus can be utilised according to the individual project requirements. Therefore cronus not only can be implemented as a WC cubicle system, but also as changing cubicle or shower separation in changing areas. All construction details are designed for high class appearance and years of failure-free functioning. A solid three-roller edge hinge made of high quality aluminium bolted six-times has been developed for cronus, which can

withstand the strongest of demands for years. All doors can be created optionally as self-closing or self-opening. The supporting legs made of aluminium with stainless steel floor plate and aluminium cover sleeves are continuously height adjustable for optimal alignment to inclining floors. As an alternative to solid grade laminated panels we offer the high-class cronus glass solution made of 12 mm toughened safety glass for front and side panels and 8 mm toughened

cronus glass with supporting legs and headrail in the front, in white green 6504

safety glass for partition panels and doors, cronus glass is ideal for discerning builders, designers and planer, who wish to combine the advantages of glass with the stability and longevity of cronus.

cronus meets the demands according to the DGNB

cronus Sustainable

cronus meets the demands according to the **DGNB** and not only contributes to sustainability, but also to your building certification: the Deutsche Gesellschaft für Nachhaltiges Bauen e.v. (German Society for Sustainable Building, registered society) is a certification system for sustainable and economically efficient building in Germany. It serves the impartial description and evaluation of the sustainability of buildings and city districts. It is essential that the DGNB system never assesses single measures but always the overall performance of a building or city district. Furthermore KEMMLIT has been certified according to **DIN EN ISO 14001** and

thereby places emphasis on the area of environmental management. The ISO 14001 norm defines environmental management requirements, which enable a company to improve its environmental performance, fulfil legal and other obligations and reach environment objectives.

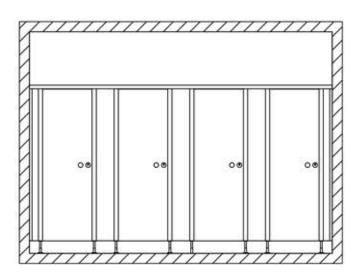

cronus with supp. legs and headrail in the front and with finger protection, in light grey 7208

cronus Standard

The standard solution for cronus is created with supporting legs and head rail situated at the front. The under panel clearance consists of 150 mm with an adjusting range of -5/+25 mm for the best possible alignment for inclining floors. The supporting legs consist of high-quality aluminium with an aluminium or nylon cover sleeve. They are connected via a force-lock to the floor and the aluminium frame construction.

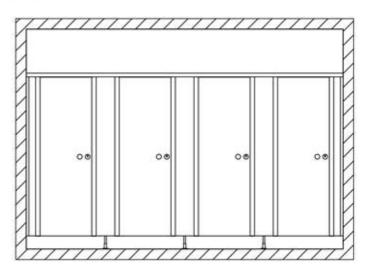

cronus support-optimised with recessed supporting legs, in lemon green 6715

cronus Support-optimised

As an alternative cronus is available as a support-optimised construction, in which the supporting legs are situated in the partition panel. Invisible to the observer, visually perfect and easy to clean.

cronus changing cubicles with central locking and individual digital print

cronus Changing cubicles

cronus is ideally suitable for dry, humid or wet areas, as shower or changing cubicles as well as communal changing cubicles for outdoor and indoor swimming pools, leisure pools, spa and rehabilitation facilities, camp sites and fitness studios.

The changing cubicles are outfitted with bench seating and central locking system to close both cubicle doors. At customer request the cubicles can be additionally outfitted with mirrors, shelves or climb-over protection.

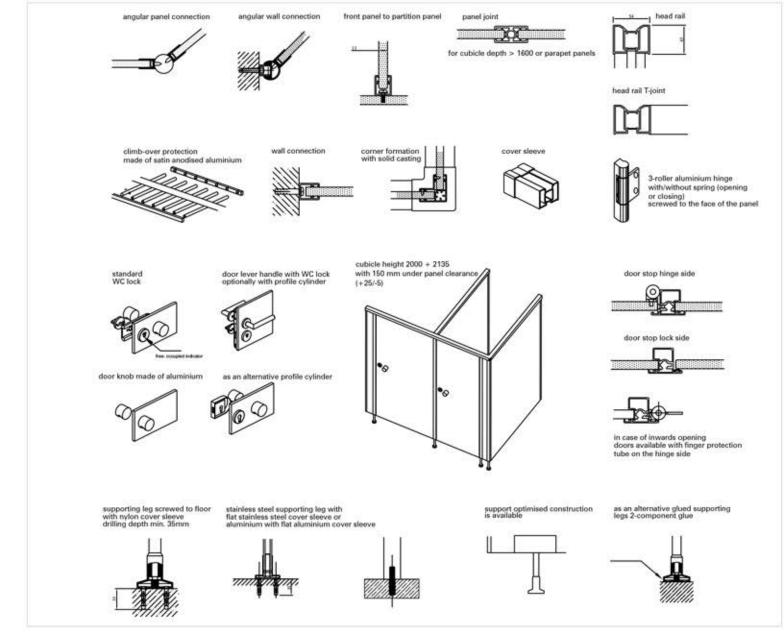

cronus Glas, in traffic white 9317

cronus Glass

The sophisticated cronus glass solution consists of 12 mm toughened safety glass front and side panels as well as 8 mm toughened safety glass partition panels and doors. The basis of this cubicle solution is the supporting construction made of satin anodised aluminium profiles which mount the cubicle elements.

The result is an extremely sturdy and long lasting partition system made of genuine glass. cronus glass can either be used as WC cubicles, changing cubicles or shower partitions. On request the option of combining the cubicle system with solid grade laminate HPL panels and glass elements is available.

cronus NR Details

In the developing stage particular attention was paid to the connection elements and details. The high quality aluminium system structure with the aesthetic profiles and linear connections guarantees a robust and solid cubicle system.

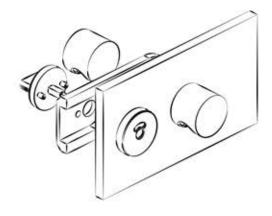

Door inner face: aluminium lock plate with FeelSafe indicator

Door outer face: aluminium door knob with indicator

3-roller edge hinge made of aluminium with stainless steel axis

cronus NR Details

Your advantages:

- Lock plate made of high quality aluminium
- WC lock made of metal, non-wearing and long-lasting
- The lock is very solid, non-flammable and corrosion-free
- Door knobs made of nylon, aluminium or stainless steel
- In addition our free-/occupied indicator on the inside of the cubicle ("FeelSafe") offers you a sense of security

Your advantages:

- The doors cannot be unhinged
- Maintenance-free bearing
- Vandal proof
- High stability
- Very long-lasting
- / Non-flammable
- Self-closing or self-opening

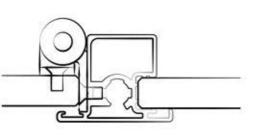

Finger protection with integrated hinges

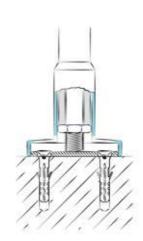

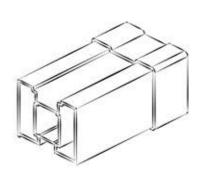

Aluminium supporting leg in the front in a static connection with the profiles

Wall connection profile with cover sleeve for custom-fit joint pattern

Your advantages:

- The doors cannot be unhinged
- Prevents fingers from being jammed
- Vandal proof, maintenance-free

Your advantages:

- With solid stainless steel floor plate
- Multiple screw connections
- Outstanding stability and longevity
 due to static connection
 with M12 screw connection
 100 % corrosion free

Your advantages:

- Attractive design
- Lasting stability due to three-chamber profile
- No visible joints due to cover sleeve

Modesty screens made of glass with supporting leg

cronus Fittings

Modesty screens are being included more and more into washroom or WC areas. Next to hygiene, privacy in particular plays a large role. cronus also offers individual solutions for this. The modesty screens can be realised in special widths and heights, with or without supporting legs. With our extensive accessories,

such as paper roll holders or door stopper hooks the cronus cubicles can be outfitted completely. The accessories are available either in stainless steel, aluminium or nylon. Theft proof screw connections as well as harmonising colours and designs. The placement of the accessories is already considered within the overall planning.

cronus NR Planning aid

Cubicle system	cronus NR (wet area)	Optional for a surcharge
Floor plan	rows of cubicles and single cubicles, any room situation	support opimised option (recessed supporting legs in the partition, headrail above the front max. front panel width (axis) > 250 mm, beyond that a supporting leg is necessary in case of gypsum plasterboard walls inlays or supporting legs are necessary special solutions possible
Cubicle height	• 2000 mm incl. 150 mm under panel clearance	2135 incl. 150 mm under panel clearance any special height available (from 2135 mm with upper panel)
Under panel clearance	Standard 150 mm, adjustable S mm / +25	special sizes available without under panel clearance available (for anteroom partitions only)
Cubicle depth	• 1500 mm	 special depths available (from 1600 mm with joint, head rail, H-profile and supporting legs in the partition panel)
Panel material	13 mm solid grade HPL laminate panel with decorative layer	
Door material	13 mm solid grade HPL laminate panel with decorative layer	as an option 8 mm TSG-glass or 30 mm aluminium composite element max. door panel height 2100 mm
Door stop	multi-chamber aluminium profile with continuous rubber buffer for noise reduction	
Door width	• 570 mm / 640 mm / 750 mm / 980 mm (nominal size)	special widths available
Swinging doors		13 mm HPL with swing hinge made of stainless steel size min. W x H 250 x 600 mm, max. W x H 600 x 1400 mm
Head rail	three-chamber profile, size W x H 54 x 43 mm in a square design	
Wall connection	aluminium U-channel for straight wall connection	
Corner connection for corner cubicles	corner connection profile made of aluminium	
Angular wall connection		aluminium U-channel
Angular panel connection		•aluminium profiles with U-channel
Upper panel		13 mm HPL max. W x H 1800 x 650 mm, larger widths have to be joint
Upper glass panel		aluminium frame with clear glass TSG 6 mm optionally with acryl glass 5 mm, max W x H 1800 x 650 mm, larger widths with joint

Cubicle system	cronus NR (wet area)	Optional for a surcharge
Suspended construction		bearer system made of aluminium powder-coated 50 x 150 mm (span width without support max. 3600 mm), or bearer system made of aluminium powder-coated 50 x 200 mm (span width without support max. 4500 mm)
Supporting legs/ floor connection	 satin anodised aluminium supporting legs with stainless steel floor plate and aluminium or nylon cover sleeve, 150 mm under panel clearance, steplessly adjustable 	stainless steel supporting leg with stainless steel cover sleeve legs glued to floor (from 80 mm under panel clearance), not available for supp. optimised without under panel clearance only for anteroom partitions
Hinges	 3-roller edge hinge made of aluminium (hinge roll Ø 20 mm), cannot be unhinged, with integrated spring – optionally for self- closing or -opening doors, 3 hinges per door 	
Finger protection		aluminium safety tube on the hinge side
Door knobs/single hand turning knob	lock case made of aluminium or powder-coated with door knob made of nylon, with red/white indicator	door knob made of aluminium or stainless steel single hand turning knob made of aluminium
Door lever handle		tock case made of aluminium with door lever handle made of aluminium, stainless steel or nylon profile cylinder lock possible
Locks	• single latch lock	 single latch profile cylinder lock double latch lock double latch profile cylinder lock
Central locking for changing cubicles		central locking underneath the bench seating overhead situated central locking
Engravings		choice of standard symbols, numbers or text overhead situated central locking individual designs available
Curtain rail		sliding rail made of satin anodised aluminium (integrated into the head rail) curtain gliders made of white plastic and curtain hooks made of metal
Climb over protection		aluminium tubes satin anodised Ø 30 mm, axis 140 mm max. cubicle depth 1600 mm
Standard colours	according to the KEMMLIT colour chart	
Special colour		special colours from all HPL-manufacturers possible, individual assessment necessary, longer delivery time
Digital print		individual digital print available
Compliance	TŪV certified, GS (tested safety)
