# DIN-rail cutter RC 300

## For fast, accurate cutting of DIN-rails to length

The **RC 300** is used for cutting to length DIN-rails in the sizes TH 15-5.5, TH 35-7.5 and TH 35-15 x 1.5.

The DIN-rails can be cut to the desired length quickly and without burr. The optimally designed lever ratio in the **RC 300** ensures that little force is required, so anyone can operate it.

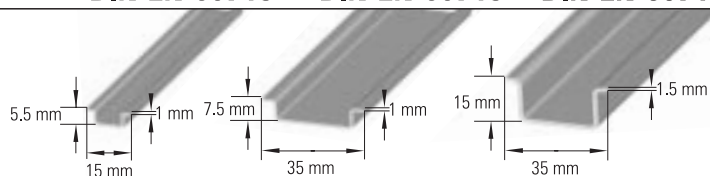

Because of the 1 m long scale, with length stop, the DIN-rails can be cut to length with millimetre accuracy.

The cutting edges are correctly angled, and no subsequent machining is required.

**TH 15-5.5**  
**DIN EN 60715**

**TH 35-5.5**  
**DIN EN 60715**

**TH 35-15 x 1.5**  
**similar to**  
**DIN EN 60715**

## Technical data RC 300

Length stop:	1000 mm max.
Dimensions (lxwxh):	1090 x 150 x 760 mm
Weight:	8.3 kg
<b>Article no.:</b>	<b>RC 300</b>
