PROFESSIONAL ESSENTIALS

TIMESCO
INSTRUMENTS FOR LIFE

TIMESCO HEALTHCARE LTD.

The Timesco General Medical catalogue contains all of our latest and essential general medical products; providing a complete and focused range for medical professionals in all areas of primary patient care.

We have introduced several new products into this edition, including nebulisers, fob watches and single use tourniquets. We have also expanded many of our existing product categories to offer a wider and more comprehensive product range. All of our products are manufactured to internationally recognised quality standards to ensure reliability, conformity and customer satisfaction.

At Timesco, we strive to build close working partnerships with our customers, ensuring transparency and support throughout the entire procurement and aftercare sales process. Our experienced sales team are available from 9am – 5pm, Monday to Friday, offering friendly and professional help and guidance on all our products.

PINK PRODUCTS

D05.905 COMPLETE MIDWIFERY PINK SET

Our pink midwifery set includes: stethoscope, sphygmo, pinard, tourniquet, fob watch, pen torch, face shield, dressing scissors, artery forceps, hand sanitiser & utility scissors.

D05.910 COMPLETE NURSES PINK SET

Our pink nurses set includes: stethoscope, sphygmo, tourniquet, fob watch, pen torch, face shield, dressing scissors, artery forceps, hand sanitiser & utility scissors.

TD1-13-209 DUAL HEAD STETHOSCOPE

This is a high quality stainless steel dual head stethoscope, at an affordable price. Supplied with pink single tube.

TDM-PM-055 FACE SHIELD IN KEY RING POUCH

Timesco's face shields are designed for convenient, effective protection from cross infection during mouth-to-mouth resuscitation. Supplied in a keyring pouch.

TDM-FW-500 NURSES SILICONE FOB WATCH

This fob watch is made from a silicone based material which is removable from the stainless steel watch. Ideal for infection control and supplied with a 2 year guarantee.

D05.110P SAPPHIRE ANEROID SPHYGMO.

Combined bellows and gauge which allows easy single handed use.

D80.020 TOURNIQUET (QUICK RELEASE)

Our quick release tourniquets have a "non pinch" action and may be quickly applied and removed without discomfort to the patient.

D85.025 PEN TORCH REUSABLE

Our reusable pen torch is the ideal tool for general diagnostic use. Each pen torch is supplied complete with batteries.

12.711.40 UTILITY TOUGH CUT SCISSORS

Timesco's utility scissors are made from stainless steel with a tough non-breakable plastic handle.

03.350.20 PINARD STETHOSCOPE

Pinard stethoscopes are a popular choice for midwives for listening to foetal heart sounds.

STETHOSCOPES

RUBY SINGLE HEAD STETHOSCOPE

The Ruby stethoscopes provide quality at an affordable price. The single head models have a diaphragm only on the chestpiece, ideal for use with a sphygmomanometer cuff.

TD1-13-101 BLUE
TD1-13-104 GREEN
TD1-13-105 RED
TD1-13-107 BLACK

RUBY DUAL HEAD STETHOSCOPE

The dual head model has both bell and diaphragm faces on the chestpiece and provides excellent sound transmission with lightweight construction.

TD1-13-201 BLUE
TD1-13-204 GREEN
TD1-13-205 RED
TD1-13-207 BLACK
TD1-13-208 PURPLE
TD1-13-209 PINK

DUAL HEAD TEACHING STETHOSCOPE

The dual head teaching stethoscope has been designed specifically for training purposes. The teaching stethoscope features two binaural headsets coupled with high quality tubing to a single chest-piece, that allow a teacher and student to listen to heart and chest sounds at the same time.

- Supplied with black tubing

TD1-13-217 BLACK

TWIN TUBE (SPRAGUE RAPPAPORT) STETHOSCOPE

The twin tube stethoscope, sometimes referred to as “Sprague Rappaport” has a traditional design with two tubes connecting the chestpiece to the head frame. This provides better acoustics to each ear.

This model is also supplied with a pack of interchangeable chestpieces for adult and paediatric use.

- TD1-13-302 BLUE
- TD1-13-304 GREEN
- TD1-13-305 RED
- TD1-13-306 ORANGE
- TD1-13-307 BLACK
- TD1-13-308 PURPLE
- TD1-13-309 PINK

ADULT DIAMOND STETHOSCOPE

The Diamond stethoscopes are made to the highest specification with internal binaural springs and a quality chestpiece with a floating diaphragm for excellent acoustics. The diaphragm and the bell have plastic non-chill sleeves for patient comfort.

Supplied with:

- Spare diaphragm
- Spare ear tips (screw)
- Foam lined box

- TD1-13-702 ADULT NAVY BLUE
- TD1-13-703 ADULT BURGUNDY
- TD1-13-704 ADULT GREEN

INFANT & PAEDIATRIC DIAMOND STETHOSCOPES

The Diamond stethoscopes are made to the highest specification with internal binaural springs and a quality paediatric (37mm diameter) and infant (30mm diameter) chestpiece with a floating diaphragm for excellent acoustics. The diaphragm and the bell have plastic non-chill sleeves for patient comfort.

Supplied with:

- Spare diaphragm
- Spare ear tips (screw)
- Foam lined box

TD1-13-717 PAEDIATRIC
TD1-13-727 INFANT

CARDIOLOGY DIAMOND STETHOSCOPE

The Cardiology Diamond stethoscope features a stainless steel double head chest-piece with a deep cone-shaped bell for excellent acoustic sensitivity.

The quality and thickness of the tube offers excellent resistance to ambient interference and the A-shaped tube design features a binaural with reinforced stainless steel inner-spring for additional durability and portability.

This stethoscope also features an anti-chill rim for patient comfort.

- Black tubing
- Spare ear tips (screw) & diaphragm
- Foam lined box

SPHYGMOMANOMETERS

EMERALD ANEROID SPHYGMOMANOMETER

The Emerald aneroid sphygmomanometer has separate bellows and gauge tubes for two handed operation. To free up one hand the Emerald features a spring loaded catch which is mounted to the rear of the dial, allowing it to be attached to the cuff or any other convenient position.

The Emerald has a 48mm dial ensuring easy reading of pressure values and is supplied with a standard adult black nylon calibrated cuff and zip up pouch for handy storage.

D05.105 BLACK

SAPPHIRE ANEROID SPHYGMOMANOMETER

The Sapphire aneroid sphygmomanometer has combined bellows and gauge, which allows easy single handed use.

The Sapphire has a 48mm dial ensuring easy reading of pressure values and is supplied with a standard adult black nylon calibrated cuff and zip up pouch for handy storage.

D05.110 BLACK
D05.110P PINK
D05.110PL PURPLE

TOPAZ ANEROID SPHYGMOMANOMETER

The Topaz aneroid model has combined bellows and gauge and also benefits from a trigger control for finger tip pressure release whilst still offering the option of screw valve release. The Topaz also has a rotating head, which allows the unit to be used comfortably by both left and right handed users.

The Topaz features a 54mm dial to ensure easy reading of pressure values and is supplied with a standard adult black nylon calibrated cuff and zip up pouch for handy storage.

D05.115 BLACK

TOPAZ DELUXE ANEROID SPHYGMOMANOMETER

The Topaz deluxe model has all of the same features as the Topaz Aneroid Sphygmomanometer, but comes with a robust metal gauge casing.

The Topaz deluxe features a durable extra large dial measuring 58mm to ensure easy reading of pressure values and is supplied with a standard adult black nylon calibrated cuff and zip up pouch for handy storage.

D05.120 DELUXE

CORAL SHOCK PROOF SPHYGMOMANOMETER

The Coral sphygmomanometer features an easy to read large dial, which is cased within a rubberised shock proof ring. The extremely durable Coral sphygmomanometer has a nickel plated metal case, which offers strength, style and quality. Another feature includes a rotating dial, which allows the unit to be used comfortably by both left and right handed users. Supplied with black nylon calibrated cuff and black zip up pouch.

D05.160 SHOCK PROOF

TOPAZ MULTI-CUFF ANEROID SPHYGMOMANOMETER

The Topaz multi-cuff sphygmomanometer has combined bellows and gauge, which allows for easy single handed use. Features include a trigger control finger tip pressure release and a rotating dial, which allows the unit to be used comfortably by both left and right handed users.

- Large adult, standard adult and child cuffs
- Zip up pouch
- Supplied in presentation box

D05.130 TOPAZ MULTI-CUFF

SPHYGMOMANOMETERS

JADE DESK/WALL SPHYGMOMANOMETER

The Jade desk aneroid sphygmomanometer has a 6" square dial designed to give a large visual display for both user and patient.

An adjustable stand allows it to be used on a desk or mounted onto a wall using the brackets supplied. The cuff and tubing stores neatly and conveniently behind the dial.

D05.150 JADE DESK/WALL

OPAL BLOOD PRESSURE MONITOR (FLOOR MODEL)

The Opal standing/floor sphygmomanometer features a large 147mm circular dial for easy measurement reading, and has a basket attached to the back of the dial for convenient storage of cuffs and inflation bulb. The Opal is supplied with an adjustable height stand (95cm to 135cm) attached to the 5 wheel base with metal castors and brakes.

- 147mm dial
- Metal castors
- 5 wheels with 360° Swivel for ease
- Adjustable height (95-135cm)
- Storage compartment
- 2 tube system

THERMOMETERS

NON-CONTACT THERMOMETER

The Thermofinder non-contact infra-red thermometer is non-invasive and does not require spare probe covers after every use, unlike the conventional tympanic ear thermometers.

The Thermofinder thermometer offers two functions (1) body temperature, simply point towards patients temporal artery (within 2-5cms) and press the start button to take a reading, and (2) ambient/surface temperature, which allows the reading of air temperature and surface temperature (bath water, baby's feeding bottles).

- Supplied with 2 x AAA batteries

D60.300 NON-CONTACT THERMOMETER

DIGITAL EAR THERMOMETER

The compact and ergonomic digital ear thermometer features a measurement response time of 1 second and has the capacity to hold 10 memory records. The auto shut off helps conserve battery life and will offer approximately 4000 uses between batteries.

- Supplied with 2 x AAA batteries.

NB-810B MESH NEBULISER

NEW
PRODUCT

The Scian Mesh NB-810B nebuliser is one of the smallest pocket size ultrasonic nebulisers available on the market and only weighs 125g. Not only is the mesh nebuliser small and portable making it ideal for use wherever you may be, but also the one button operation, auto switch off (when medicine cup is empty), and low battery indicator make the mesh nebuliser simple and easy to use.

The NB-801B utilises state of the art Electrospray technology, which sprays liquid medication in aerosol form and delivers it directly to the patient for easier breathing. The filter and medicine cups do not require replacement which reduces the cost of nebulisation.

- Pocket size and easy to carry
- Silent in operation
- Automatic turn off when medicine is deplete
- Particle size: MMAD 5 microns
- Capacity of medicine cup: Approx 8ml maximum and approx 0.5ml minimum
- Requires 2 x AA batteries, supplied
- Battery Life: Up to 1.5 hours if used continuously – 4 days if used for 20mins per day
- Dimensions: 45 x 60 x 120mm
- Weight: 125g (excluding batteries)

Includes:

- Mouthpiece
- Mask Adaptor
- Carry Pouch
- Child inhalation mask with connecting tube
- Adult inhalation mask with connecting tube

- D10.100 MESH NEBULISER

RESUSCITATORS

RESUSCITATORS - SINGLE PATIENT USE

The Ion-Air manual resuscitators are supplied complete with oxygen tubing, an oxygen reservoir bag and a suitably sized anatomical air cushion mask. They are supplied pre-assembled for immediate use and are packed in a tamper proof sealed bag, which is double wrapped in a draw string bag.

The Ion-Air manual resuscitators are available in a range of sizes, including an infant (300ml), a child (550ml) and three adult sizes (1000ml, 1400ml & 1600ml).

The child and infant bags incorporate a 35cm H²O safety pressure release valve to protect against over inflation of the lungs.

With its textured grip and 360° swivel, the resuscitator is extremely versatile and easy to use with either a face mask or endotracheal tube. The transparent bag offers complete internal visibility.

Key features:

- Textured grip (non-slip)
- 360° swivel connector for greater versatility
- Glued components (with exception of face mask)
- Adjustable air cushion face mask for maximum patient comfort
- Transparent bag for complete internal visibility
- Excellent recoil recovery following bag compression
- Available in a variety of sizes
- Reliable & durable
- Latex free

SUCTION DEVICES & CONSUMABLES

EVAC-S SINGLE USE SUCTION DEVICE

A completely single use, manual, hand held suction device. It is supplied with a 300ml canister, an adult and a paediatric catheter, plus a self-seal disposal bag with a biohazard label for convenient disposal.

The device is easy to assemble, just connect the catheter of your choice and the product is ready to use. After use the device can be placed back into the polybag, resealed and the product label can be peeled to reveal a biohazard warning label.

- Completely single use - no risk of contamination
- Vacuum (max): 500mmHg
- Peak free airflow: >20ml
- Disposable container volume: 300ml
- External diameter of cap (suction port): 17mm
- External diameter of catheters: 9mm Adult, 10fg Paediatric
- Operating environmental temperature: -20°C to +50°C
- Storage environmental temperature: -40°C to +60°C
- Net weight: 270g
- CE marked
- ISO 13485

The box contents are:

- 300ml canister
- Adult catheter
- Paediatric catheter
- Self-seal disposal polybag
- Bio-hazard label ready to be displayed for disposal
- Multilingual product instructions
- Multilingual product labelling
- Supplied in boxes of 5

TDM-ESD-100 EVAC-S SINGLE USE SUCTION DEVICE (PACK OF 5)

RESCUER MVP SUCTION PUMP

This is a lightweight, high vacuum, portable emergency device, which can be powered with one hand operation, leaving the other hand free for different tasks. It was designed with a 100° swivel, which gives the operator better accessibility whilst working in tight situations and avoids premature engagement of the overflow mechanism. This unit was designed to provide efficient operation and simple maintenance. The Rescuer pump has multiple settings, allowing the pump to be used on neonates to large adults.

TDM-MVP-100 RESCUER MVP SUCTION PUMP ASPIRATOR

3 YEAR
GUARANTEE

CB31 SILICONE DROP PROOF FINGER TIP PULSE OXIMETER

The CB31 pulse oximeter offers a unique soft silicone housing for superior comfort and fit. The silicone housing also offers an additional layer of protection around the body of the pulse oximeter making it a very robust, durable unit. The CB31 is supplied with battery, lanyard and 2 year guarantee.

- 8 hours continuous use
- Drop proof (1 meter)
- Suitable for adult & paediatrics
- Auto power down, low battery indicator
- OLED displays SpO₂, PR, pulse bar & plethysmogram
- Supplied with battery (1 x AAA) & lanyard

TDM-PO-CB31 SILICONE DROP PROOF FINGER TIP PULSE OXIMETER CB31

W1 WRIST PULSE OXIMETER

The 300W1 wrist pulse oximeter/sleep monitor offers a small and portable design ideal for all night monitoring and recording of SpO₂ and pulse rate. The 300W1 can offer spot checking or continuous recording for up to 24 hours on a new set of batteries. The 300W1 is commonly used by patients with sleep apnea or patients with heart or breathing issues.

- LCD display
- SpO₂, PR and pulse bar
- 30 hour data storage
- Set up to 10 ID codes
- Transfer data to PC
- Software to analyse data
- Supplied with battery (1 x AAA)

12.711.51 PROBE POINT, 19CM (7.5") PACK OF 10 - BLACK

EQUIPMENT BAGS

All our medical equipment bags are made from MicrAgard. A material with high tenacity and lightweight properties that gives full antimicrobial protection, excellent abrasion and tear resistance. The material is reflective for high visibility. The bags are flame retardant to aircraft standards, fluid repellent, non-rot, UV stable, washable at 60°C with silverstorm self healing and waterproof zips.

EXMOUTH PIONEER BAG

The MicrAgard Exmouth Pioneer bag has been designed by midwives to enable equipment for home delivery and basic life support to be contained in a lightweight, portable and durable way; ideal for work in the community.

The bag features two inner velcro pouches, mesh pockets and an external zip up compartment for storage of further equipment or documents. Supplied with shoulder strap.

Dimensions: (L) 45 x (W) 27 x (D) 30cm.

TDM-MB-130B EXMOUTH PIONEER BAG

ENTONOX CYLINDER BAG

Specifically designed to contain all necessary equipment to administer Entonox. The large top allows all tubing, patient valve and face mask to be connected within the bag ready for use.

Available for double or single cylinder use.

TDM-OX-050 ENTONOX BAG SINGLE CYLINDER

TDM-OX-055 ENTONOX BAG DOUBLE CYLINDER

SALISBURY CRASH BAG

The Salisbury crash bag was developed to accommodate a selection of basic airway management and resuscitation equipment. The bag features an internal pocket and is supplied with an adjustable shoulder strap.

Dimensions: (L) 48 x (W) 22 x (D) 18cm.

TDM-MB-015B SALISBURY CRASH BAG

EMERGENCY BARREL BAG

The emergency barrel bag features a removable easy-clean lining, which opens out completely flat once removed from the bag. The bag offers several rows of elasticated retainers, which can hold a range of tubes and equipment and a “D” size medical oxygen cylinder (not supplied). Supplied complete with shoulder strap.

Dimensions: (L) 20 x (W) 64 x (D) 28cm.

TDM-MB-020B EMERGENCY COMPACT BACKPACK

EMERGENCY COMPACT BACKPACK

This MicrAgard emergency compact backpack was originally designed for carrying resuscitation and diagnostic equipment in the community.

The compact backpack consists of a main compartment, with two side pockets and one large front zip up pocket.

The bag also features shoulder straps and a carry handle for easy handling.

Dimensions: (H) 36 x (W) 30 x (D) 18cm.

TDM-MB-054B EMERGENCY COMPACT BACKPACK

EMERGENCY BACKPACK

The emergency backpack is a durable, flexible backpack designed to suit the requirements of today's emergency professional.

The backpack features two large outer pockets, which allow quick and easy access to equipment or documents. The interior of the bag contains six large tear out velcro pouches with clear tops. Each bag is equipped with a comfortable backpack shoulder strap harness and belt, plus carry handles on both top and sides. By removing one internal roll you can accommodate an airway management tool roll.

Dimensions: (H) 56 x (W) 40 x (D) 60cm.

TDM-MB-055B EMERGENCY BACKPACK

Additional item:
TDM-MB-080 TOOL ROLL (GREEN)

DOPPLERS

SONICAID SR2 DIGITAL DOPPLER

Introducing the Sonicaid SR2 digital doppler, rate and trace display doppler with a fixed 2 MHz waterproof probe. This high sensitivity handheld digital doppler is intended for general purpose screening of the FHR at all stages of pregnancy from as early as 8-10 weeks, right through to labour.

New features include:

- Large FHR numeric or trace modes offers enhanced FHR screening with high visibility backlit colour screen with “BIG” numbers & “TRACE” display view
- Improved audio: Dynamic digital noise reduction and gel filter
- Trace & sound storage: Store and playback patient tests
- Connectivity & communications: Via USB to software package
- Improved performance: Specially designed high performance probes
- Rechargeable: reduced running costs

TDM-HT-SR2 SONICAID SR2 DIGITAL DOPPLER

MOBILE STAND FOR ULTRA-TEC DOPPLERS

TDM-HT-ACC52 MOBILE STAND FOR HUNTLEIGH DOPPLER

A mobile stand with a platform for secure mounting of handheld units.

3 YEAR
GUARANTEE

ULTRA-TEC PD1 AUDIO DOPPLER

The Ultra-Tec PD1 is a small, lightweight, high sensitivity pocket doppler. Its 2MHz foetal doppler probe is ideal for use by a general practitioner or midwife for routine antenatal foetal detection.

The foetal signal is available to the user via the built in loudspeaker or optional headset with output level controlled by edge mounted volume control.

The foetal signals are easily located using the lightweight narrow beam transducer while internal signal processing minimises the noise artefacts.

TDM-PD1F2 ULTRA-TEC PD1 AUDIO DOPPLER

3 YEAR
GUARANTEE

ULTRA-TEC PD1+ FOETAL DOPPLER

The Ultra-Tec PD1+ is a small, lightweight, high sensitivity pocket doppler with built in foetal heart rate processing.

The foetal heart rate is displayed on a large LCD display with the audio signal available to the user via the built in loudspeaker, or optional headset with output level controlled by rotary volume control. FHR traces are available by connection of the serial output to the optional UltraTrace 2 PC compatible software.

The foetal signals are easily located using the lightweight narrow beam transducer, while internal signal processing minimises the noise artefacts.

TDM-PD1F2-FHR ULTRA-TEC PD1+ FOETAL DOPPLER

ULTRA-TEC WATER BIRTH DOPPLER

The Ultra-Tec PD1DWR is an extension of the PD1+ to provide general practitioners or midwives with a product suitable for use in "water birth" applications. A waterproof probe allows foetal signals to be located easily under water, while the audio and foetal heart rate data are available in the normal way.

The unit has all the features of the PD1+ but has a waterproof probe for use in "water births", which allows complete immersion of probe for foetal assessment.

TDM-PD1DWR ULTRA-TEC WATER BIRTH DOPPLER

3 YEAR
GUARANTEE

MOBILE STAND FOR ULTRA-TEC DOPPLERS

TDM-PD1-SMT MOBILE STAND FOR ULTRA-TEC DOPPLER

A mobile stand with a platform for secure mounting of handheld units.

SCALES

SECA BABY, TODDLER & CHILD SCALES

Two scales in one: the Seca 385 and Seca 384 baby scales, with a comfortable weighing tray. In no time at all, it can be converted into a floor scale for children with a capacity of 50kg (Seca 385) or 20kg (Seca 384). The weighing tray and the base that serve as the floor scale, are securely locked together, thus ensuring that the baby can be weighed absolutely safely. However, at just the touch of a button, the tray can be detached from the base.

A further advantage of the scale is its Breast-Milk-Intake function, which determines how much milk the baby has consumed.

The robust but lightweight scale is easy to transport; self-explanatory buttons make it easy to operate.

SECA 385 BABY, TODDLER & CHILD SCALES

- Capacity: 20kg | 50kg
- Graduation: 20g | 50g
- Dimensions: 552 x 162 x 362mm
- Weight: 2.8kg
- Power supply: Battery
- Functions: TARE / weighing range switch-over / automatic switch-off / BMIF / hold

TDM-S-385 SECA 385 BABY, TODDLER & CHILD SCALES

SECA 384 BABY & TODDLER SCALES

- Capacity: 10kg | 20kg
- Graduation: 10g | 20g
- Dimensions: 552 x 162 x 362mm
- Weight: 2.8kg
- Power supply: Battery
- Functions: TARE / weighing range switch-over / automatic switch-off / BMIF / hold

TDM-S-384 SECA 384 BABY & TODDLER SCALES

Illustrated without tray

SECA CARRY CASE FOR 384 AND 385 SCALES

With this case, baby scales Seca 385 and Seca 384 can be transported comfortably and safely. The exact fit of the Seca 413 provides optimum protection and the large opening facilitates the packing and unpacking of the scales. An adjustable shoulder strap makes transport easier and the water-repellent nylon surface keeps everything dry.

TDM-S-413 SECA 413 CARRY CASE FOR 384 & 385 SCALES

TDM-S-431B SECA BACKPACK FOR 384 & 385 SCALES

SECA 877 FLAT SCALES

These scales are intended for mobile use and are lightweight, yet very stable and suitable for persons weighing up to 200 kilograms. It stands firmly on four self levelling feet that guarantee stability, even when small children are weighed whilst held by an adult. The mother/child-function ascertains the child's weight with just the touch of a button.

- Capacity 200kg
- Graduation 100g < 150kg > 200kg
- Functions: mother/child-function, tap-on automatic switch-on, automatic switch-off
- Dimensions: 315 x 58 x 313mm
- Weight 3.5kg
- Class III scale
- Batteries

TDM-S-877 SECA 877 FLAT SCALE

SECA 704 WIRELESS ELECTRONIC COLUMN SCALES

- Capacity: 300kg
- Graduation weight: 50g < 150kg > 100g
- Weight: 14.9kg
- Power supply: Batteries / Optional Power Adaptor
- Dimensions: 360 x 930 x 520mm
- Functions: damping / PRINT / Auto-PRINT / Auto-CLEAR / Automatic weighing range switch-over / SEND / Auto-SEND / RESET / Acoustic signals can be activated / HOLD / BMI / Auto-HOLD / Automatic switch-off / Transport castors / TARE / Mother / child-function / Pre-TARE

Weighing small children to obese patients, the Seca 704 can do it all, especially when it comes to finding out BMI and height (with the use of the optional Seca 220 measuring rod). Other advantages include the high load bearing capacity of up to 300 kg for heavier patients, the large and flat platform and time-saving functions pre-TARE, HOLD, auto-HOLD and mother/child-function.
