# Core Happiness

Every considered design detail and elegant engineering solution contributes to the endurance and performance of our equipment. This comes to you with our pleasure.

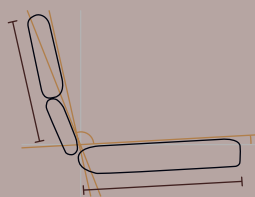

Colour key

Height adjustment

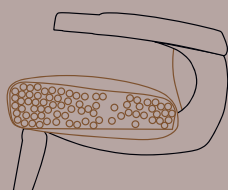

Lockable rotation

Comfortable working space

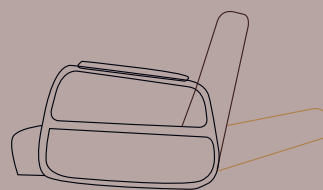

Backwash + Sidewash access

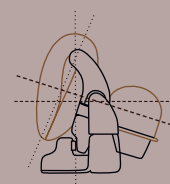

Chair angles + proportions

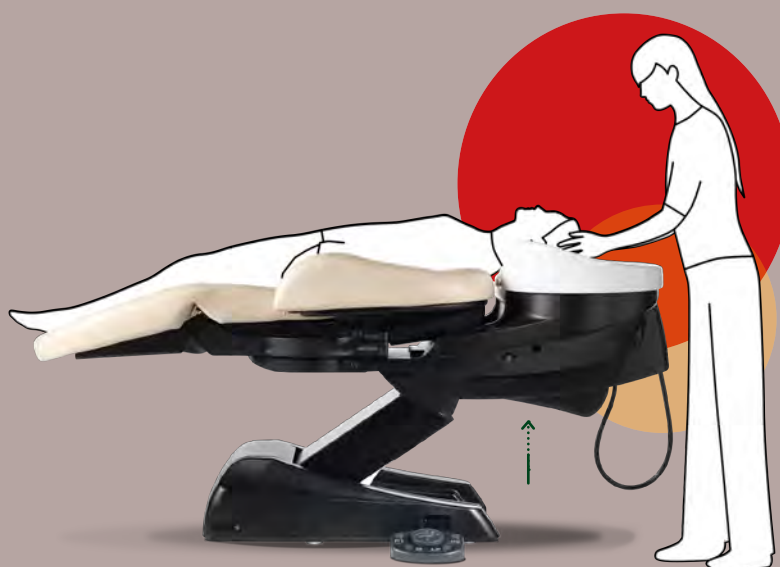

Cushion contours + density

Natural recline motion

Backwash neck support

The comfort and happiness of your Clientele is our raison d'être.  
For Technicians, we like to create immaculately efficient and inspiring  
working spaces – this is our long-time passion.

For everyone's health and beauty, we continue to dream and innovate,  
seek out improvements and make beautiful salons.

Adria  
*series*

*To die for.*

Adria comprises functionality and beauty in a perfectly proportioned form. Timeless by immaculate design and very possibly immortal by its clever construction.

This chair works for you.

Made in Italy

**Chair**  
Adria II

**Adria II**  
with White shell

**Adria II**  
with Black shell

- ← Features include
- removable and replaceable cushions
  - fibreglass chair shell in Gloss-Black or Gloss-White
  - upholstered padded armrests
  - Chrome armrests and footrest
  - hydraulic base options

## the Modernists' favourite for decades

**Adria**, fka. **SC-191A**, was conceived in 1973 by Michael Quennessan, a French designer. For the past twenty years it has been nicknamed after the Father of modern hair-dressing, because every one of his salons used Adrias.

removable and replaceable chair cushions

# Treatment *processors*

Healthy is beautiful.

Our processors defy convention, but being easy to operate is central to each of their innovative designs.

Process colours and perms at lower temperatures and for shorter durations than traditional machines, and produce better results than ever.

Offer healthier, longer-lasting treatments to your Clients, and give the perfect outcome for today's busy and beautiful Client.

**Made in Japan**

**Mist Processors**

Micro Mist

Spa Mist II

~

**Dry Heat Processors**

Roller Ball F

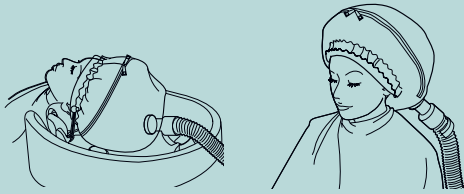

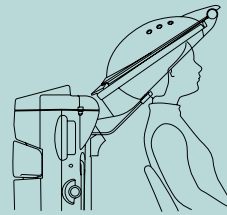

*Deeper* cuticle penetration of any treatment particles ensures better results; colour is more vibrant and enduring, and other chemical processes last longer with the help of mist.

The difference between mist and steam is the water temperature and particle size: the cooler, smaller mist delivers more treatment particles and less water deeper into the hair cuticle.

Low mist temperature = 40–50°C  
Steam = 100°C

Spa Mist II treatments at the backwash and in the chair (with or without cap)

Mist cap and hood circulate the heat and mist around the head

Our ingenious pieces of equipment have replaced the need for the old-style steamer and dryer duo.

Features include →  
 programmable presets  
 integrated cooling system  
 low temperatures  
 compact & mobile

**Micro Mist**  
 for seated Clients

**Spa Mist II**  
 for seated / reclined Clients

# *How does the most powerful heat processor contribute to haircare?*

## **Roller Ball F –**

- 1. does not exceed the scalp temperature at which hair becomes damaged.*
- 2. achieves longer-lasting colour and perm results than other heat processors.*
- 3. reaches 40°C in about two minutes.*
- 4. halves the processing time of treatment chemicals.*

**Roller Ball F**  
Mobile version

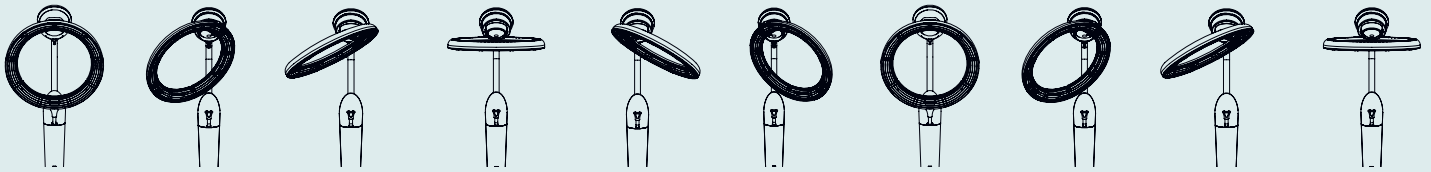

**Roller Ball F**  
Wall-mounted version

← Features include  
model options  
body colour options

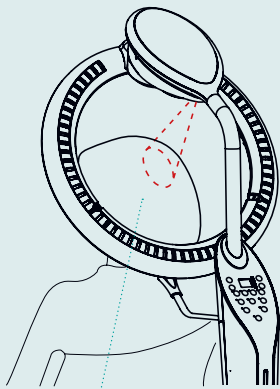

# Rotating the heat source ensures the most even treatment

Rotation can be paused at any time or position

Perm processes last for 3-12 minutes, colours are 5-15 minutes depending on the Client's hair type.

infrared sensor maintains scalp temperature

easy-wipe surfaces and control panel

programmable presets and manual control with 7 scalp temperature levels

Wall-mounted version with space-saving retractable arm

height-adjustable

height-adjustment foot lock

Mobile version with smooth-running wheel-base and detachable power cord

available in 7 colours

## Project planning

We are keen to estimate delivery times to assist your project planning, but we recommend that Clients consult us directly regarding more specific lead-times. Many items are upholstered or made to order in Japan, with an estimated delivery of 12-18 weeks. Items from the UK, Italy or Europe can be delivered sooner, estimated at 4-6 or 9-10 weeks respectively. Most chair bases are held in UK stock.

Takara Belmont's experienced Upholsterers have carefully selected specific fabrics for each chair to achieve optimum styling and ensure extended durability.

Select colours from our 'Standard' or 'Alternative' ranges, or upgrade to a 'Special Option' as you like.

Your salon and your equipment are a key element of your expressiveness, we understand that. Your dream is our dream. As such, if a colour that you have in mind is not offered within our specified ranges, please enquire with your dealer.

# Warranty

## STANDARD LIMITED WARRANTY POLICY

All Belmont products are guaranteed against mechanical, electrical and workmanship faults, under normal working conditions, for a period of three years from date of delivery. Labour is covered for the first 12 months of the three year period.

This guarantee shall become null and void if the damage and its consequences are due to improper manipulation of the product, or modifications to the product are carried out by persons not authorised by Takara Belmont (UK) Ltd.

Every chair we make has breath, and spirit.

It lives, works and endures.

It has heard, seen and remembered.

It serves, and serves well.
