

Call Logging

ARM Call Logging Software guarantees complete transparency and helps to streamline processes.

- Management reports
- Full audit trail

ARM Call Logging Software provides a full audit trail of events, a comprehensive record of everything that occurs on the system. It offers:

- Continuous recording of events
- Full audit trail
- Generation of management and maintenance reports
- Easy search functionality
- Print, save and export searches

Information is recorded in the form of:

- Call point activation: date and time, location name, call level, staff ID, response time
- Staff presence: date and time, location name, presence, staff ID

System requirements: windows XP, Vista, 7, 8, 8.1 & 10 (serial port or USB-serial adapter required)
