2022 Industrial (Radio) Panic Button System

The Big Red button for staff safety

The **Radio** Big Red button can be integrated with all Call Aid UK radio receivers to provide an easy to install and use staff panic alarm system. This wire free product allows the Big Red button to be easily moved as shop floor layouts change.

Recommended to be fitted in areas where staff work alone or operate machinery.

Big Red specification:

- Easily seen
- Sealed to IP65
- Heavy duty design
- Internal long life battery
- Operates at 868MHz
- Auto battery health check
- Wall mounting
- Machine mountable
- Confirmation buzzer to confirm signal sent
- Radio repeaters available for poor signal areas

Applications

- Factories
- Lone workers
- Swimming pools
- Steam rooms
- Saunas
- Outdoor work spaces
- Scrapyards
- Adventure parks
- Garages
- Distribution depots

Optional panic alarm strip

The none illuminated strip can be integrated with the Call Aid UK battery radio call units to provide an instant solution that is easy to install and use.

Please see overleaf for more information.

200I Industrial (Wired) Panic Button System

The **Big Red** button for staff safety

The **wired** Big Red button can be integrated with all Call Aid UK wired display controllers to provide an easy to install and use staff panic alarm system. This wired version allows for additional facilities that are not possible with the radio product. These include:

- Reassurance lamp in the Big Red button.
- Continuous buzzer option in the Big Red button.

Illuminated call/alarm strip

The illuminated strip can be integrated with the Call Aid UK wired call units to provide an instant solution that is easy to install and use. Illuminated versions cannot be used with the radio only system.

Build and Features

- End of line monitoring – guaranteeing continuity of alarm strip
- Available in either bright anodised, satin anodised aluminium base
- Robust, flexible, continuous insert available in blue, red and green
- Virtually unbreakable laminated composite structure, won't tear or rip
- End caps are designed to be vandal and tamper proof
- Easy clean
- Self-monitoring

Optional

- Anti-microbial coating and impregnation of insert for life long protection against 99.9% of super bugs (kills MRSA, C- Difficile, E-Coli and Salmonella at spore level)
