

Elite Hog Tray Lifting Bar

The easy way to safely lift your roasted Pig

Until now the only way to lift a heavy pig when using a Hog Tray was back-breaking and potentially dangerous. The Elite Hog Tray Lifting Bar makes raising & lowering the pig so much easier and provides greatly enhanced safety. Two horizontal brackets simply clip underneath the hog tray handles and 2 or more people can now lift the pig into your Elite Roaster without the need to bend your back, and more importantly after cooking, easily and safely lift the Hog Tray into the carving position.

Tea towels and welding gloves are **definitely** a thing of the past!

Hog Tray lifting – now perfected!

- Up to 4 people can use the lifting bar safely even with the largest of Hogs
- 2 Adjustable arms designed to fit both standard and giant Hog Tray options
- Easy to clean
- No assembly required
- UK Manufactured in heavy-duty 304 Stainless Steel

Simply place the sleeve underneath the Hog Tray handles

Square box section eliminates movement

Strong stainless steel box section will safely accommodate the largest of pigs
