

Fuse Board

Code	Description
S348	A PCB fuse board module for splitting power from a low voltage power supply (1-30v ac or dc) into 8 individually fused outputs. 500mA fuses are provided but can be changed on site as required. Mounting holes for fixing onto nylon pillars are provided.

Code	Description
S348B	A boxed version of the S348 PCB fuse board module for splitting power from a low voltage power supply (1-30v ac or dc) into 8 individually fused outputs. 500mA fuses are provided but can be changed on site as required. 8 red LEDs indicate the status of each fuse. A front and back acting tamper switch is also fitted.
