AWARD WINNING - LARGE MODEL RANGE

EASY TO USE- RELIABLE

PR PHARMACY FRIDGES

Designed to reliably store refrigerated medicines and vaccines. 10 fridge sizes from 30 litres to 1250 litres.

All QED pharmacy fridges have hard wearing metal chambers.

The 30 and 60 litre models can be bench or wall mounted.

Models up to 500 litres have a 5 year warranty and are available with solid or glazed doors.

Larger solid door models are heavy duty for bulk medicine storage.

All have a key lock that can be upgraded to digital keypad.

CRT CABINETS

These are the CRT version of our pharmacy fridge and designed to reliably store non-refrigerated medicines.

The cooling system correctly monitors and maintains the temperature for storage below 25°C as specified by the majority of pharmaceutical manufacturers.

There are 9 sizes available from 30 to 1250 litres.

These cabinets are ideal for medicine storage in clinical trials as well as use in routine hospital settings.

There are five CRT models that can be fitted with an inner Controlled Drugs cupboard.

CD-CRT CABINETS

Designed specifically to store Controlled Drugs below 25°C as required by BS2881:1989 and all Misuse of Drugs legislation.

The cooling system correctly monitors and maintains the temperature below 25°C.

There are 6 sizes available from 27 litres to 240 litres.

All must be wall mounted.

MED-CRT CABINETS

These wall mounted cupboards are an alternative to the freestanding CRT style cabinets.

The cooling system correctly monitors, controls and maintains the temperature below 25°C in warm weather.

There are 5 sizes available from 108 litres to 240 litres.

Can also be fitted with an inner cupboard for Controlled Drugs (MED-CRT/CD models).
